

## Magic Purse

**Purpose:** To develop visual memory

**You will need:**

- A small bag or purse for each
- A selection of objects that could fit inside

**How to carry out activity:**

1. Explain to your child/children that they can take turns to choose an object to put in their purse/bag.
2. Each person chooses an object, states what it is and puts it in their purse.
3. On their next turn, they need to remember what is in their purse before taking another item.
4. Keep going round taking turns until there are too many objects for the child to remember.

**Challenge:**

- Increase size of participants, so they have to remember items for longer between turns
