

CB10 Curriculum Outline Term 2

Dear Parents and Carers,

Welcome back! We hope you had a lovely break and that your child is ready for another exciting term of learning, exploring and growing. We look forward to seeing the children grow in confidence as they learn through play, exploration, stories, creative activities and meaningful experiences.

Kind regards, Rachael Watt, Class Teacher and Katie Lennox and Nicole Green, EYPs

Health and Wellbeing

We have gym on a Monday and Tuesday this year so please make sure pupil have a kit in their bag or at school. In PE, this term, children will develop their ball skills through fun and active games. They will practise rolling, throwing, catching, kicking and bouncing a ball, while developing their balance, coordination, control and spatial awareness. Children will develop important life skills such as independence, confidence, communication, cooperation and taking turns. They will have opportunities to practise everyday skills and make choices within their learning through cooking, tidying up and taking more responsibility in their own personal care.

Literacy

We will be learning about Core Words to develop confidence in early reading. Children will have opportunities to see, hear, recognise and use core words through: Visuals, songs and rhymes, stories, play, everyday activities and movement and sensory experiences. The emphasis is on repetition, enjoyment and meaningful communication. Through fun, sensory activities such as painting, children will develop their confidence and control in making marks. Using visual grids and a Go Talker communication device, children will be supported to develop communication, language and early literacy skills by making choices, expressing ideas and participating in shared learning.

Numeracy

Children will develop their understanding of **quantities and numbers** through practical, play-based activities. They will explore counting, matching numbers to quantities and recognising numerals. We will also explore **sequences and patterns**, encouraging children to identify what comes next and create their own simple patterns. Children will begin to develop an understanding of **time** by talking about daily routines, ordering events and using language such as *before, after, first, next, morning* and *afternoon*.

Interdisciplinary Learning

In CB10 we will be learning about the Sky, Space and forces. Children will explore the world around them, developing a sense of wonder about the sky and space. They will learn to recognise the sun, moon and stars and talk about how they are connected to our daily routines, such as day and night.

Through play and everyday experiences, children will investigate simple forces such as push and pull. They will explore how different toys and objects move and discover how their actions can make objects change direction, speed up, slow down or stop.

Outdoor Learning

Through visiting the woods behind the school and curiosity-led approach, children will develop confidence, independence and practical skills through exploring nature, searching for minibeasts, collecting natural materials, climbing, balancing, building, problem-solving and working with adults in a range of outdoor experiences.

Reminders

PE

Please make sure you have gym kit (black shorts, black plimsolls and white T-Shirt) at school or in your bag on these days.

Allergy Aware School

We need to ensure to be safe for pupils with allergies. We have pupils and members of staff with allergies so please don't bring snacks with nuts to school and please be mindful of pupils with dairy allergies too. Thank you!

Expressive Arts

Music - We will develop our sense of rhythm through exploring different musical instruments and different genres of music.

Art and Design - Children will explore art through printing and painting, experimenting with colour, pattern and texture to create their own artwork.

Drama - Children will practise for our Christmas show building confidence for performing whether on the stage or on camera.
