## Special Collectors Edition: World Bee Day

### What we've *bee-n* up to...

Despite the school being closed, pupils and staff came together on Wednesday 20th May to celebrate World Bee Day. At home, pupils dressed in yellow and black; completed a range of learning tasks; and created their own 'bee' inspired works of art. Staff were blown away by the efforts of pupils and we thank parents and carers for helping to make this such a successful event. Here's just a sample of what pupils got up to.

## In other news...

The lockdown has also meant that plans to develop our school gardens and encourage wildlife to visit our campus have been put on hold. Though once again, our amazing pupils, staff and parents have made the best of current circumstances and completed lots of our planned tasks at home, including:

- Setting up insect houses
- Making bird feeders
- Gardening
- Pond dipping
- Going on nature walks
- Engaging in outdoor exercise

## Prior to the lockdown...

- P5 pupils planted cherry blossom trees
- Our P6 and P7 Junior Road Safety Officers delivered a 'be bright, be seen' workshop for P1 pupils
- We purchased items for our school gardens, including insect houses and bird boxes
- We conducted regular litter surveys around our campus
- The Eco Committee led pupils from across the school to create a collage that promotes our anti-litter message
- P4 pupils investigated the impact of marine litter
- P3 studied the polar regions and this led them to sponsor a penguin and polar bear through the WWF
