

SIMPLE SPHERO IDEA 4

TEN PIN BOWLING

RESOURCES

Box of Spheros

iPad with Sphero Edu app

Set of bowling pins (available from Home Bargains or Amazon from £5, alternatively plastic water bottles with rice to weigh down slightly and decorated with coloured stickers or similar)

GAMES – Use the Sphero app, players open DRIVE and use the drive circle on the left side (Remember to aim the Sphero first!)

1. Use the Sphero to knock down the pins as in traditional ten pin bowling
2. Space the ten pins out in a line, set a stopwatch. Time how long it takes a player to knock each pin down, bringing the Sphero back to the same starting point each time
3. Space the pins out in a circle and set a stopwatch. Someone chooses a colour and the player has to knock down pins of that colour only. If the pins are the same colour, use stickers to differentiate them. Quickest around is the winner
4. Set an obstacle course using the pins, set a stopwatch and ask players to navigate the course. Quickest around is the winner
