

Activity

Woolly Mammoths grew to approximately 4 metres tall and had legs over 3 metres long!

A mammoth step was approximately 2.2 metres long. Use the mammoth footprints to count how many of your steps is equal to one mammoth stride.

Woolly Mammoths

- Four different species of mammoth have been found in Britain, but only the Woolly Mammoth has been recorded in Scotland.
- Mammoths roamed the grounds of Eglinton Park as recently as 27 000 years ago.
- Fossilised mammoth tusks were found in Dreghorn and Kilmaurs in the 19th Century.

What other woolly animal roamed Eglinton Park? Scan the QR code to find out.
