

Activity

Sit quietly, wait and watch.
What birds can you see?
Use the natural materials around you
to create a bird's nest to keep eggs
and chicks warm.

Birds

- There are 22 species of duck commonly seen in the UK. Of these, the Mallard is the most common.
- In winter, family flocks of Blue Tits join together to search for food.
- Male and female Robins look identical.
- The Gold Crest is the UK's smallest bird species. Their thin beaks are ideal for feeding on insects hiding between pine needles.
