

Grid Method - Spicy

L.I.: To use the grid method to calculate multiplication problems.

Example: $238 \times 39 = 9282$			
x	200	30	8
30	6000	900	240
9	1800	270	72

Remember to add the value from the highlighted boxes to get your final answer.

Use the grid method to answer the following questions (have a look at the video from yesterday on the blog to remind you of the process if you need to):
