

Grid Method – Extra Hot

L.I.: To use the grid method to calculate multiplication problems.

Example: $238 \times 439 = 104,482$			
x	200	30	8
400	80000	12000	3200
30	6000	900	240
9	1800	270	72

Remember to add the value from the highlighted boxes to get your final answer.
