

## Maths & Numeracy

**MATHS:** All pupils will explore how to use simple directions and describe positions in movement, games and technology. They will also investigate ways in which data is presented and be able to ask and answer questions about the information it contains.

**NUMERACY P1:** Will develop a range of addition strategies.. **P2:** Will consolidate and extend their knowledge of addition and subtraction strategies to solve number problems within 20.

## Literacy & English

**PHONICS:** Pupils will continue to develop their phonic skills either with Phase 2 or Phase 3 & 4.

**HANDWRITING:** We will continue to develop our letter and number formation as well as provide opportunities for the pupils to refine their line drawing skills.

**WRITING:** This term pupils will be explore recounts and procedural writing which will include writing their news as well as a range of instructions and recipes.

**READING:** Primary 1 pupils will now progress onto reading books which will allow them to apply their developing phonic skills. Primary 2 pupils will continue to develop their skills in reading both fiction and non-fiction texts. All pupils have Buddies from P6/7 and this has had a positive impact on their reading.

## P.E.

In Term 2, will develop and extend their ball skills in game play with a focus on hockey and tennis . They will also learn a range of social dances. Our P.E. days will remain as **Tuesday** and **Wednesday** and for pupil safety, please ensure long hair is tied back and no jewelry is worn on those days.

Should you have any questions or worries about your child, please do not hesitate to get in touch at the end of the school day or through making an appointment at the school office.

**Mrs McGregor**

## Health & Wellbeing

This term the pupils will discuss how to improve and manage their own learning as well as explore developing a growth mindset.

## Social Studies/Sciences

Due the children's interests, our topic of Canada became the main focus of Term 1. As result our Term 2 topic is now Toys & Games and the pupils have already selected areas of key interest.

In Science, we will explore how toys are built and operated as well as where they get their energy from. The pupils will also research toys and games from the past to the present day.

## Expressive Arts

**MUSIC & DRAMA** All pupils will develop and extend their performance skills this term as they prepare for our Christmas Show.

**ART & DESIGN:** We will explore collage using a variety of media and textiles. The pupils will also further develop their modelling skills using clay and other mixed media.
