

Dividing by 6

When you are dividing you are sharing out. If you are dividing by 6, you are sharing out amongst 6.

Remember inverse properties (multiplication *loves* division):

$$6 \times 2 = 12$$

$$2 \times 6 = 12$$

$$12 \div 2 = 6$$

$$12 \div 6 = 2$$

Write your 6x table out first to help you with the following.

Copy and complete each of the following:

a $18 \div 6 = \dots$

b $12 \div 6 = \dots$

c $30 \div 6 = \dots$

d $24 \div 6 = \dots$

e $42 \div 6 = \dots$

f $36 \div 6 = \dots$

g $48 \div 6 = \dots$

h $54 \div 6 = \dots$

i $60 \div 6 = \dots$

Find the missing numbers:

(Tip: Ask yourself, "What number would I need to divide by 6 to get the answer?")

a $\dots \div 6 = 0$

b $\dots \div 6 = 7$

c $\dots \div 6 = 1$

d $\dots \div 6 = 8$

e $\dots \div 6 = 4$

d $\dots \div 6 = 9$
