

Dividing by 7

L.I. - I am learning to use the 7 times table to help me find the answers.

When you are dividing you are sharing out. If you are dividing by 7, you are sharing out amongst 7.

Remember inverse properties (multiplication loves division):

$$7 \times 2 = 14$$

$$2 \times 7 = 14$$

$$14 \div 2 = 7$$

$$14 \div 7 = 2$$

Write your 7x table out first to help you with the following.

Copy and complete each of the following:

a $21 \div 7 = \dots$

b $35 \div 7 = \dots$

c $14 \div 7 = \dots$

d $42 \div 7 = \dots$

e $63 \div 7 = \dots$

f $49 \div 7 = \dots$

g $56 \div 6 = \dots$

h $28 \div 7 = \dots$

i $70 \div 7 = \dots$

Find the missing numbers:

(Tip: Ask yourself, "What number would I need to divide by 7 to get the answer?")

a $\dots \div 7 = 0$

b $\dots \div 7 = 7$

c $\dots \div 7 = 1$

d $\dots \div 7 = 8$

e $\dots \div 7 = 4$

d $\dots \div 7 = 9$
