

## The S2 ICT course

- research using the Internet, and includes introduction to databases, presentation software, and design their own T-shirts, all as part of the Foreign exchange theme Trading Places unit.

- The second unit in S2 ICT involves using the on-line SQA SOLAR software which will allow the student to learn about Internet Safety and if successful (pass online assessments), they will attain a SQA unit pass.

- The final unit in S2 ICT will involve students creating their own Impossible and Pong games using SCRATCH software and then creating their own review website using Dreamweaver web authoring software.
