Dear David

Thankyou for taking us on the fabulous bug walk. My favourite bug was the white tailed bumble bee because it had a white bottom.

The white tailed bumble bee was very interesting because white tailed bumble bees can sting for very long. I loved the camouflaged frog because it camouflaged into the grass and it was funny because it jumped when we were looking at it. I felt very very happy.

yours sincerely

chloe erant

P.S. I loved the bug walk and I hope you come again.

Dear David

Thankyou for taking us on a Fabulous bug walk on Friday. I liked looking for the string on the walk. I learned that when grass is dead it will fall on top of all the other dead grass. We saw a frog among the dead grass and it was brown and patterned and camouflaged with the grass and it was my favourite part. I was partners with Karla and we found a grass bug and loads of flies. Stay close to an adult and on the way there we found a cuckoo flower and I learned that orange tipped butterfly's lay their eggs on them and Chel sea found an egg on another cuckoo flower I felt really happy and excited. I loved getting fresh air and using the net. You made the bug walk fun great exciting amazing and fun.

Yours sincerely

AMY Stewart

p.s. Thankyou for the wild flower seeds I am looking forward to planting them.
