I can solve addition word problems!

Read these sentences and turn them into addition chimney sums! Here is an example:

*I picked **410** apples on Monday. I also picked **310** apples on Tuesday. How many apples did I pick altogether?*

$$\begin{array}{r} 410 \\ + 310 \\ \hline 720 \end{array}$$

1. Juliet watched **230** episodes of *My Little Pony* in the morning and **248** episodes in the afternoon. How many did she watch altogether?
2. Lexi travelled **551** miles on a horse. She had a rest, and then travelled another **322** miles. How far did she travel altogether?
3. Nathaniel saw **602** stars through his telescope at 6pm, and then another **254** stars at 8pm. How many stars did he see altogether?
4. Millie has **£444** and Chloe has **£444**. How much money do they have altogether?
5. Mr McNab got **273** Star Wars toys for his birthday and another **224** for Christmas. How many toys did he get?
6. Xander made a lego tower with **717** bricks. Tony Alexander added on **281** bricks. How many bricks were in the tower altogether?
7. It rained for **450** minutes yesterday and then **416** minutes today. How many minutes did it rain altogether?
8. Baby McNab needed his nappy changed **538** times in the morning and **461** times in the afternoon. How many times did he need his nappy changed altogether?
