I can use different ways to subtract numbers!

Turn these boring old horizontal take-away sums, into cool and awesome chimney sums in your jotter or on paper! Just like this:

$$23 - 11 \quad \text{becomes} \quad \begin{array}{r} 23 \\ -11 \\ \hline 12 \end{array}$$

1) $18 - 5$

2) $29 - 9$

3) $46 - 2$

4) $73 - 1$

5) $87 - 4$

6) $21 - 10$

7) $30 - 20$

8) $65 - 24$

9) $58 - 36$

10) $99 - 99$
