

Tuesday 2nd February 2021

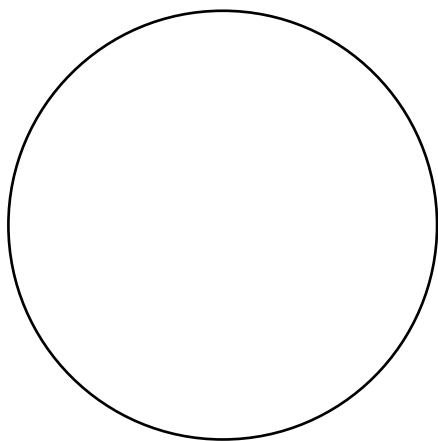

I can find fractions of shapes

Look at the **bottom** number of each fraction. This will tell you how many pieces to chop your shape into.

Then look at the **top** number of each fraction. This will tell you how many pieces to colour.

Remember, when you are chopping up your shape, each part should be the **same size**.

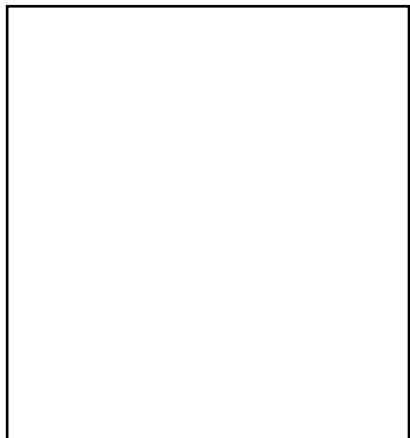

$$\frac{2}{4}$$

$$\frac{4}{5}$$

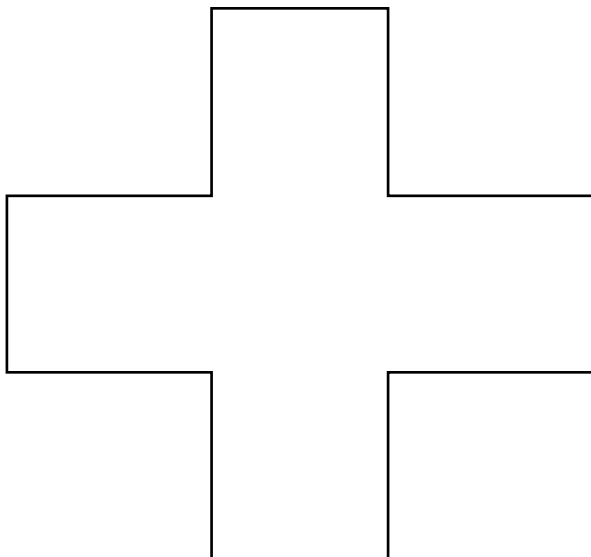

$$\frac{2}{3}$$

$$\frac{5}{10}$$

$$\frac{1}{2}$$

$$\frac{1}{1}$$
