

**Second Level: Measure**

**The Great Maths Bake Off**

Decide on a recipe that you would like to make. Get an adult to help you.

The BBC Food website has a lot of recipes if you need some inspiration.

Once you have chosen a recipe work out how much you need of each ingredient. Can you convert this to a different unit?

*Example:*

<b>Ingredient</b>	<b>Unit of measure (grams/kilograms/litres etc)</b>	<b>Converted</b>
Self Raising Flour	1500g	1.5kg

What did you bake?

What maths skills did you use?
