

First Level: Expressions and Equations

Can you make each side of these number sentences balance?

Remember  $\neq$  means that it is not equal to

$$34 + 10 = 40 + \square$$

$$5 + 6 \neq \square + 3$$

$$2 \times 5 = 5 + \square$$

$$53 > 45 + \square$$

$$10 + \square \neq 14 - 2$$

$$23 - \square = 17 + 3$$

$$13 + 2 \square 15 + 3$$

$$\square + 2 < 14 - 1$$
