

Find the fractional amounts. You can use blocks or counters to help or solve the problems in your head using division:

a $\frac{1}{5}$ of 20 =

$20 \div \underline{5}$ =

b $\frac{1}{4}$ of 12 =

$12 \div \underline{\quad}$ =

c $\frac{1}{3}$ of 18 =

$18 \div \underline{\quad}$ =

d $\frac{1}{6}$ of 18 =

$18 \div \underline{\quad}$ =

e $\frac{1}{5}$ of 15 =

$\underline{\quad} \div \underline{\quad}$ =

f $\frac{1}{9}$ of 27 =

$\underline{\quad} \div \underline{\quad}$ =

g $\frac{1}{2}$ of 14 =

$\underline{\quad} \div \underline{\quad}$ =

h $\frac{1}{7}$ of 21 =

$\underline{\quad} \div \underline{\quad}$ =
