

**Punctuation: Commas in Lists**

In files you will see a booklet headed 'Commas in Lists' The first page is a title page, the second is a page of examples of how to use commas when writing a list. The third page is your worksheet and the last page has the answers.

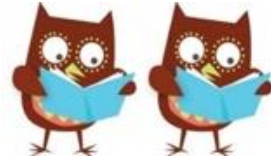

**Reading - week 2 same book**

Go to the Oxford Owl website. Log in to our class account.

See 'Files' in our Glow class team and then 'Class Materials' for our login details and the book you should read. Answer questions in e- book.

<https://www.oxfordowl.co.uk/>

**Writing**

<https://www.pobble365.com/greedy/>

Click on the link to see the picture

Scroll down to choose two or more of the activities:

- Story Starter
- Question Time
- Sentence Challenge
- Sick Sentences
- Perfect Picture

**Spelling - week 2 same common words**

Check in 'Files' then 'Class Materials' section for your spelling words.

Complete the activities to help you learn your words.

**Numeracy and Mathematics**

Click on the links below to learn how read and display data in a bar chart. Watch the tutorial videos and then complete the practice tasks that follow.

**Primary 4**

<https://www.bbc.co.uk/bitesize/articles/zmtx8hv>

**Primary 5**

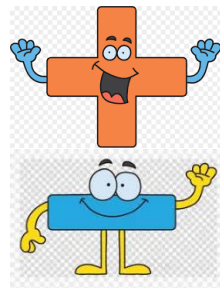

<https://www.bbc.co.uk/bitesize/articles/zsrgp4j>

**Numeracy and Mathematics**

Complete a mental maths challenge every day. Choose addition or subtraction and try to beat your score and time by the end of the week.

<https://www.topmarks.co.uk/maths-games/daily10>

**Numeracy and Mathematics**

Have a look at the following clip explaining column subtraction with borrowing ('regrouping' as it is called in the video)

<https://www.youtube.com/watch?v=pv8URIRgCdo>

Copy and complete or print the worksheet in the Class Materials section.

Challenge: Can you create 5 two-digit subtraction sums involving borrowing for a family member to solve? Remember to work out the answers too, so that you can correct them! 😊

**Numeracy and Mathematics**

What is **division**? What do you know? Create a poster displaying your ideas. You can include examples of division sums, examples of pictures which show division taking place, the division symbol, written examples of what you think division means. Try to ensure that your poster is as bright and colourful as possible. Please upload your work, we would love to see your posters!

## Staycation 2020

1. You are a tour guide and your task is to create and present an interesting and funny script for a company who run sightseeing tours for children. Choose one of Scotland's cities (Aberdeen, Dundee, Edinburgh, Glasgow, Inverness, Perth, Stirling).

- Are there already tours in the city? It's OK to use some of the ideas online, maybe you have some ideas of your own too.
- What do you think children would enjoy seeing and learning about? Make short notes on each.
- Plan the route through the city.
- Put the notes in the order of your tour.
- Practise reading the notes out, remember to include some facts which children will find interesting or amusing.

## Presentation

- Dress up and practise being a tour guide in front of your family, pets or cuddly toys.
- You may like to make a PowerPoint showing all the stops on your tour, you could add in some pictures and music too.
- You could make a video or audio recording of this, remember if you are making a video that your face should not be shown.

2. Collect wrappers from food containers which have been made by Scottish companies. Use them to make a collage on the blank Scottish flag or map. You can upload this to Teams.
