

Nursery Home Learning PlanWB:18/5/20

Literacy	Numeracy/Maths	Health & Wellbeing	Other Areas
<p>Spend time reading a favourite story with your family.</p>	<p>What other board games do you have, spend time choosing one and playing together with your family.</p>	<p>Build a den using materials you have e.g. blankets, duvets and cushions. Use this space for your story time.</p>	<p>What can you find to print with, bubbles, leaves and cars? Give it a try you just need water.</p>
<p>Rhyme time: Head, Shoulders, Knees and Toes. (Missing out head then shoulders, knees and toes, getting everyone up and trying the actions).</p>	<p>While out exercising see what numbers you can see, take photos and when home try and copy these.</p>	<p>Make a healthy funny face using fruit and vegetables. Post onto our Twitter page for all to see.</p>	<p>Record on a phone a little daily/weekly diary of what you have been doing each week. Get your family involved by replaying it to them.</p>
<p>Draw around your hand and foot and your families, cut them out and colour in to create your own design.</p>	<p>Bring together all the hands and feet you have created and sort them by size, colour, see who is the biggest and smallest, thickest and thinnest.</p>	<p>As you have been helping to set the table, maybe you and your siblings could be the waiters and waitresses and serve the adults dinner. Taking their orders and clearing at the end of dinner.</p>	<p>Take some of your toys outside and see what shadows they make, draw around them on the ground or onto paper.</p>
<p>Draw a picture of the setting of your book, talk about what you can see.</p>	<p>Check your height chart to see how you have grown in the last 2 weeks.</p>	<p>While out exercising one day have a nature hunt. How many birds/butterflies/bumblebees can you see and hear? Take photos so you can look back and draw or count them.</p>	<p>Take part in one of the many online dance or exercise classes; make this part of your daily/weekly routine.</p>

Use the touchy/feely box you created to play Kim's Game (look at what is in the box and then get someone to take one item out and for you to then guess what is missing).

Create cards with dots on them 1 to 10.
Find objects around your house and garden matching the same amount to the dotted cards.

Let's work to develop your fine motor skills. Draw lines (straight/jaggy/wavy) onto paper and cut out staying as close to the lines as you can.

Create a touchy/feely box. Get family members to have a feel and guess what is inside (you can give them clues).
