

Recycle with us and help us win a playground for our school!

We've joined TerraCycle, a global leader in sustainability solutions on a mission for Eliminating the Idea of Waste®, to help collect and recycle hard-to-recycle rubbish, e.g. items that traditional facilities typically don't accept.

We're currently taking part in the **Sistema Recycled Playground Contest** from TerraCycle and Sistema, for a chance to win a playground with a frame made of 100% recycled materials—including recycled food containers. The pupils of the contest-winning school and the runner-up will also receive a **Sistema food container and a reusable bottle** (up to 300 pupils). Together, let's join our efforts to recycle as many used food containers and reusable water bottles as we can, to help protect the environment and increase our chances to win the prizes!

Here's how you can help:

① Collect your used food containers and reusable water bottles at home.

② Drop your waste at Holy Family Primary

[name drop-off location in the school]

③ The last day to bring your waste is the 11th December

[date of your choice to send the waste before the contest ends on 18th December 2024]

Let's do our part to keep more waste out of landfills and incinerators and win exciting prizes for your school, including a playground!

Please contact [The Eco Rights Team](#) for more information.
