Results as a chart: Pupils are supported and challenged to extend their learning.

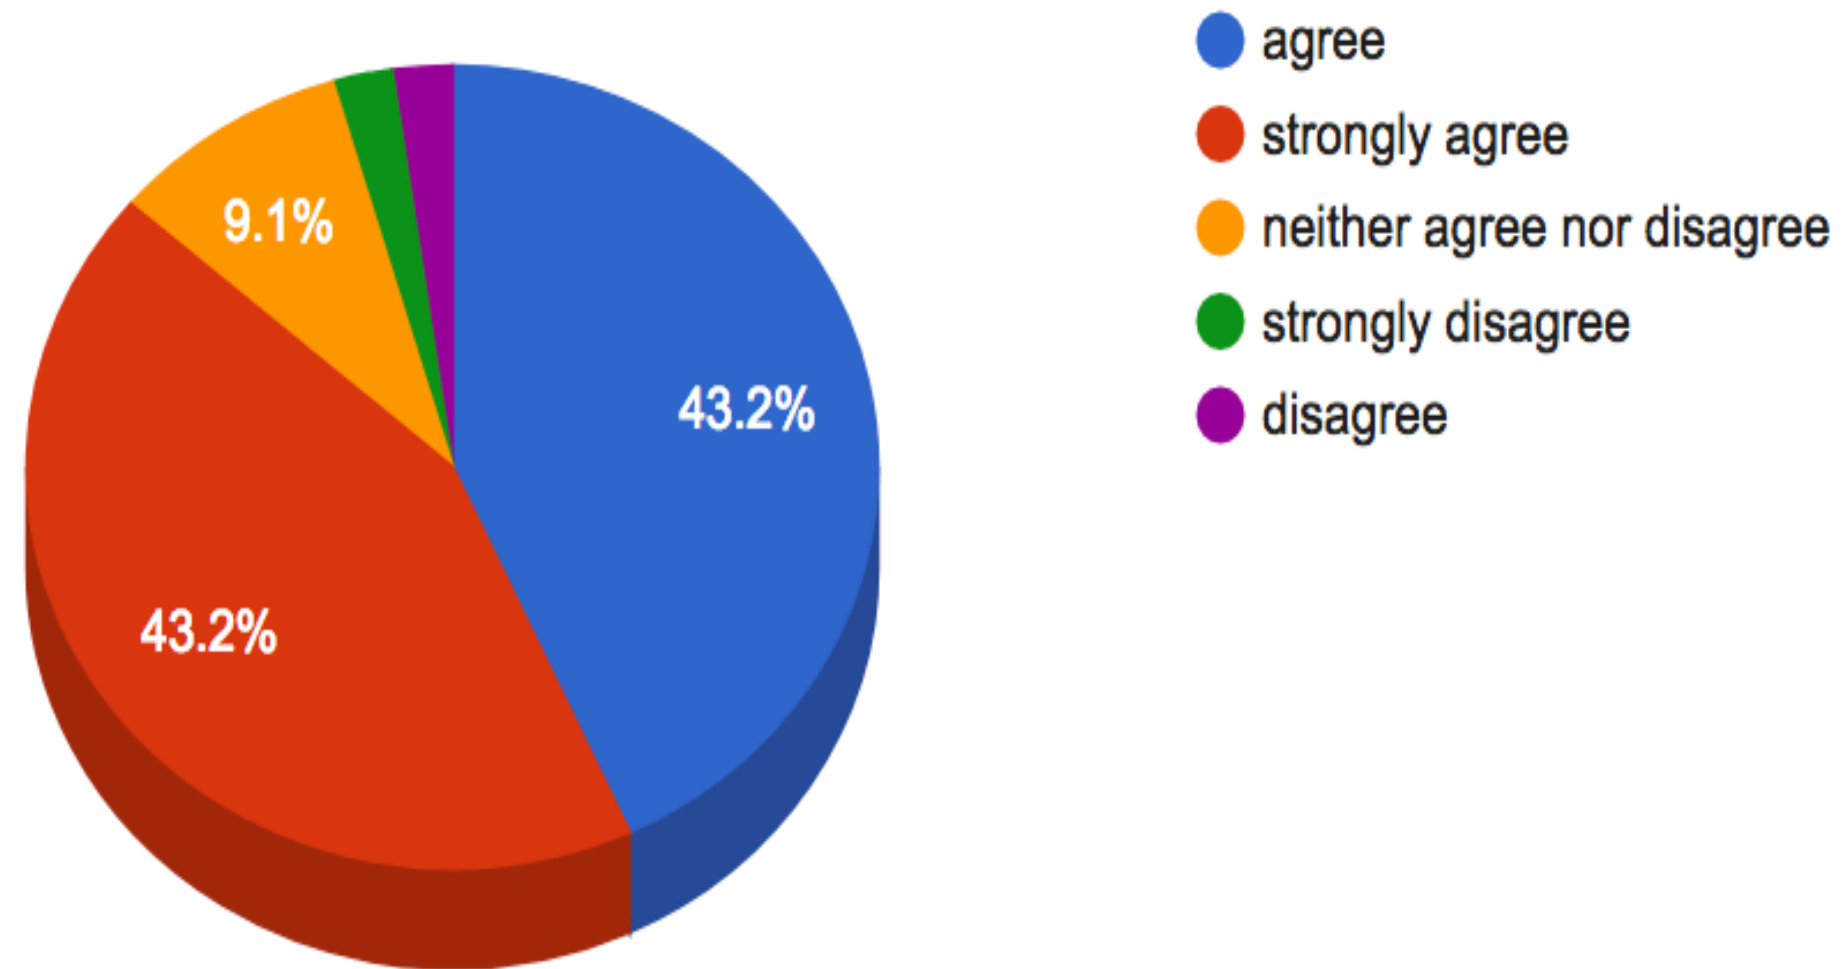

Results as a chart: My child is making progress at school.

Results as a chart: I know how to support my child's learning at home.

## How Good Is Our School? Parental Survey (April 2019)

Overall very happy, don't have any issues to disclose. As I am not on social media if school could text or letter in advance about holidays or activities it school as my child gets mixed up trying to explain.

I strongly believe that homework is not a constructive way for my child to learn as I feel with busy family life, when we get home from work/ school/ after school, homework is rushed & causes stress and frustration when trying to have family time, eg dinner, spend a few hours of quality time together.

Nothing needs improved

Try & pick up any discrepancies or changes in learning faster & relay to parents ASAP. Listen to parents more & act on actions from pupil ASAP.

Continue with family after school clubs

Would like me things to help with at home to tie on with day to day learning

Opportunities for parents to help with after school activities and programmes

Maybe more support for parents to help with homework

Unfortunately, most of the stuff where parents are invited to attend are during the day. I understand why this is done but I find it difficult to do because I work and feel guilty not being able to join in

Continue parent participation and information events
