

OPTICAL ILLUSIONS

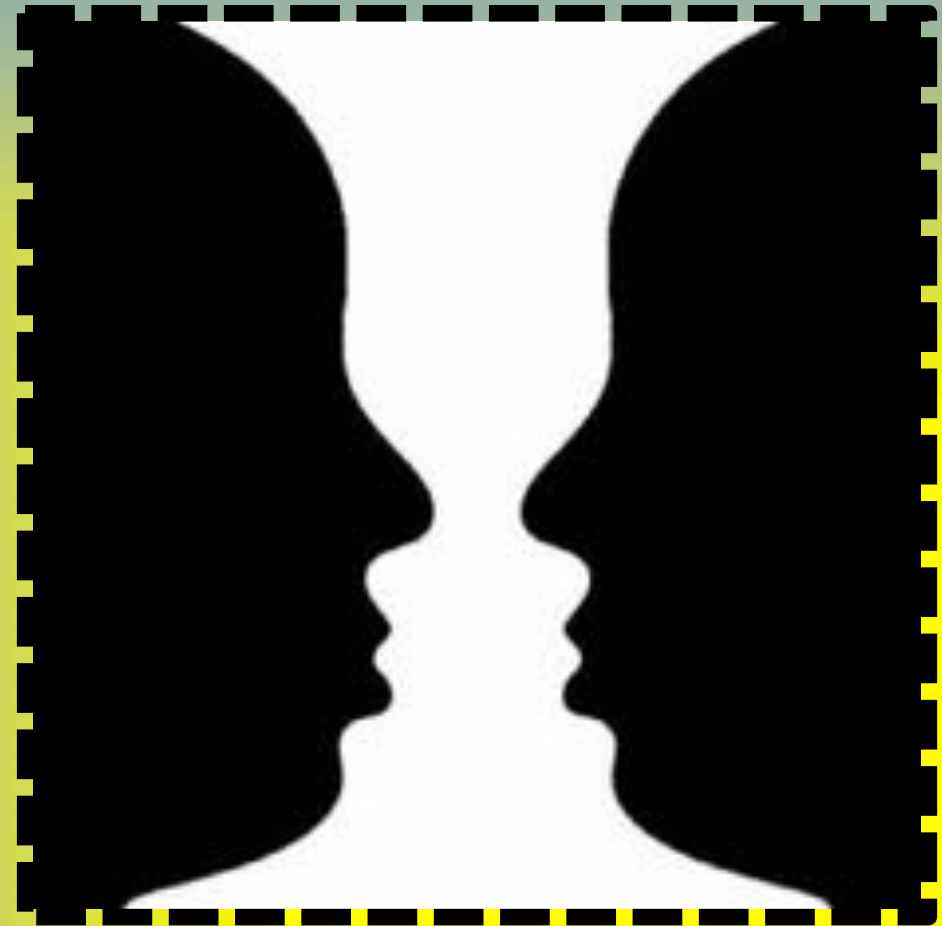

*What
can
you
see?*

OPTICAL ILLUSIONS

◆ Illusions trick us into seeing something which is different to what actually exists/is real.

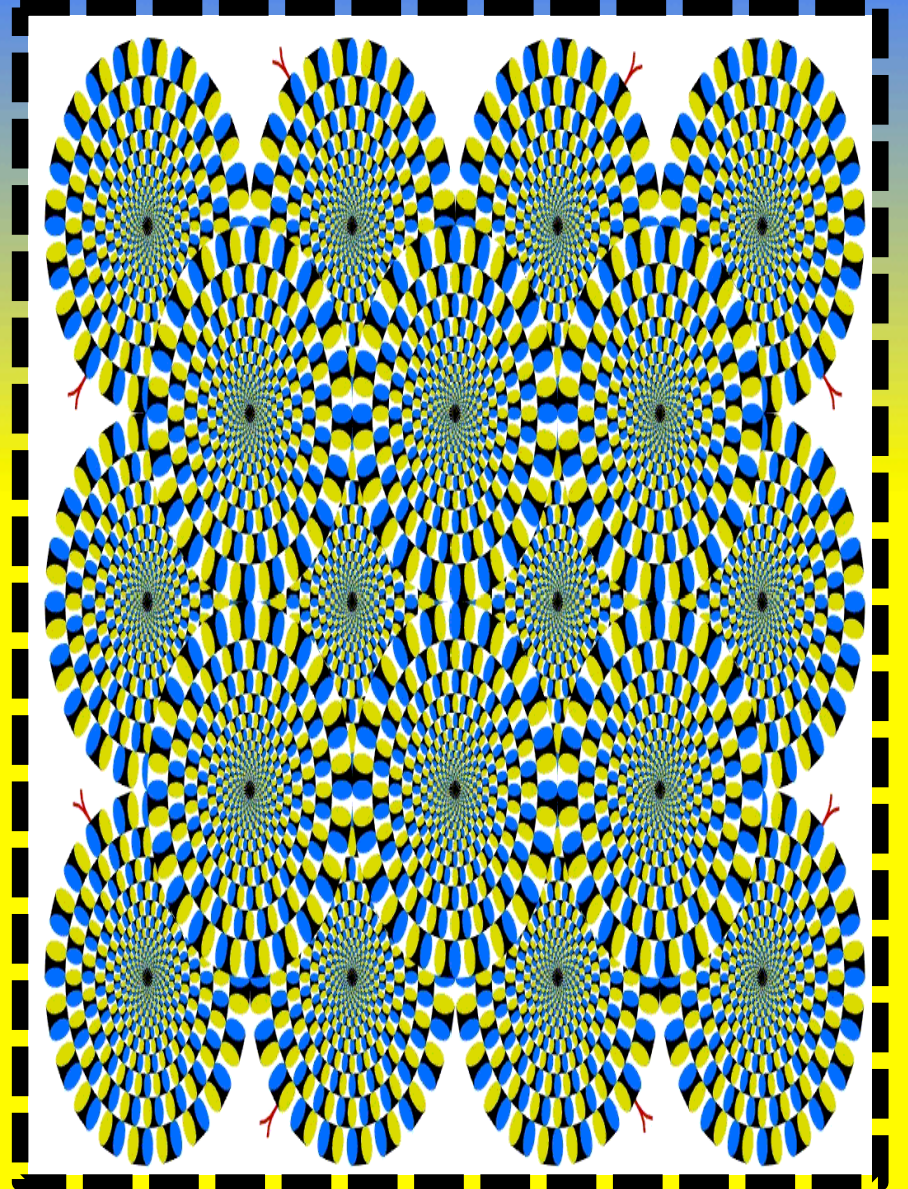

OPTICAL ILLUSIONS

◆...So what we see in front of us doesn't match what is really there!

...It doesn't correspond to physical reality.

OPTICAL ILLUSIONS

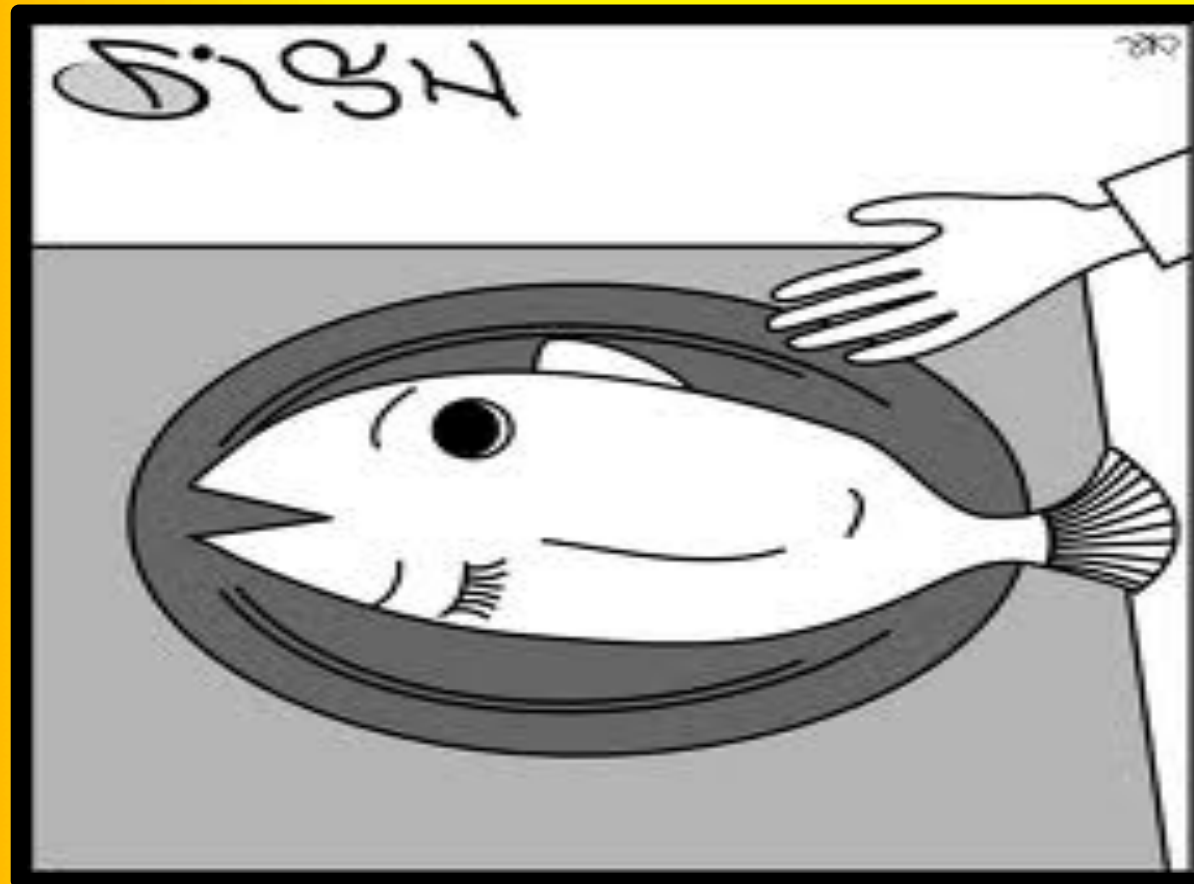

◆..Some illusions show us one thing in a picture, but maybe someone else sees something different in the same picture!

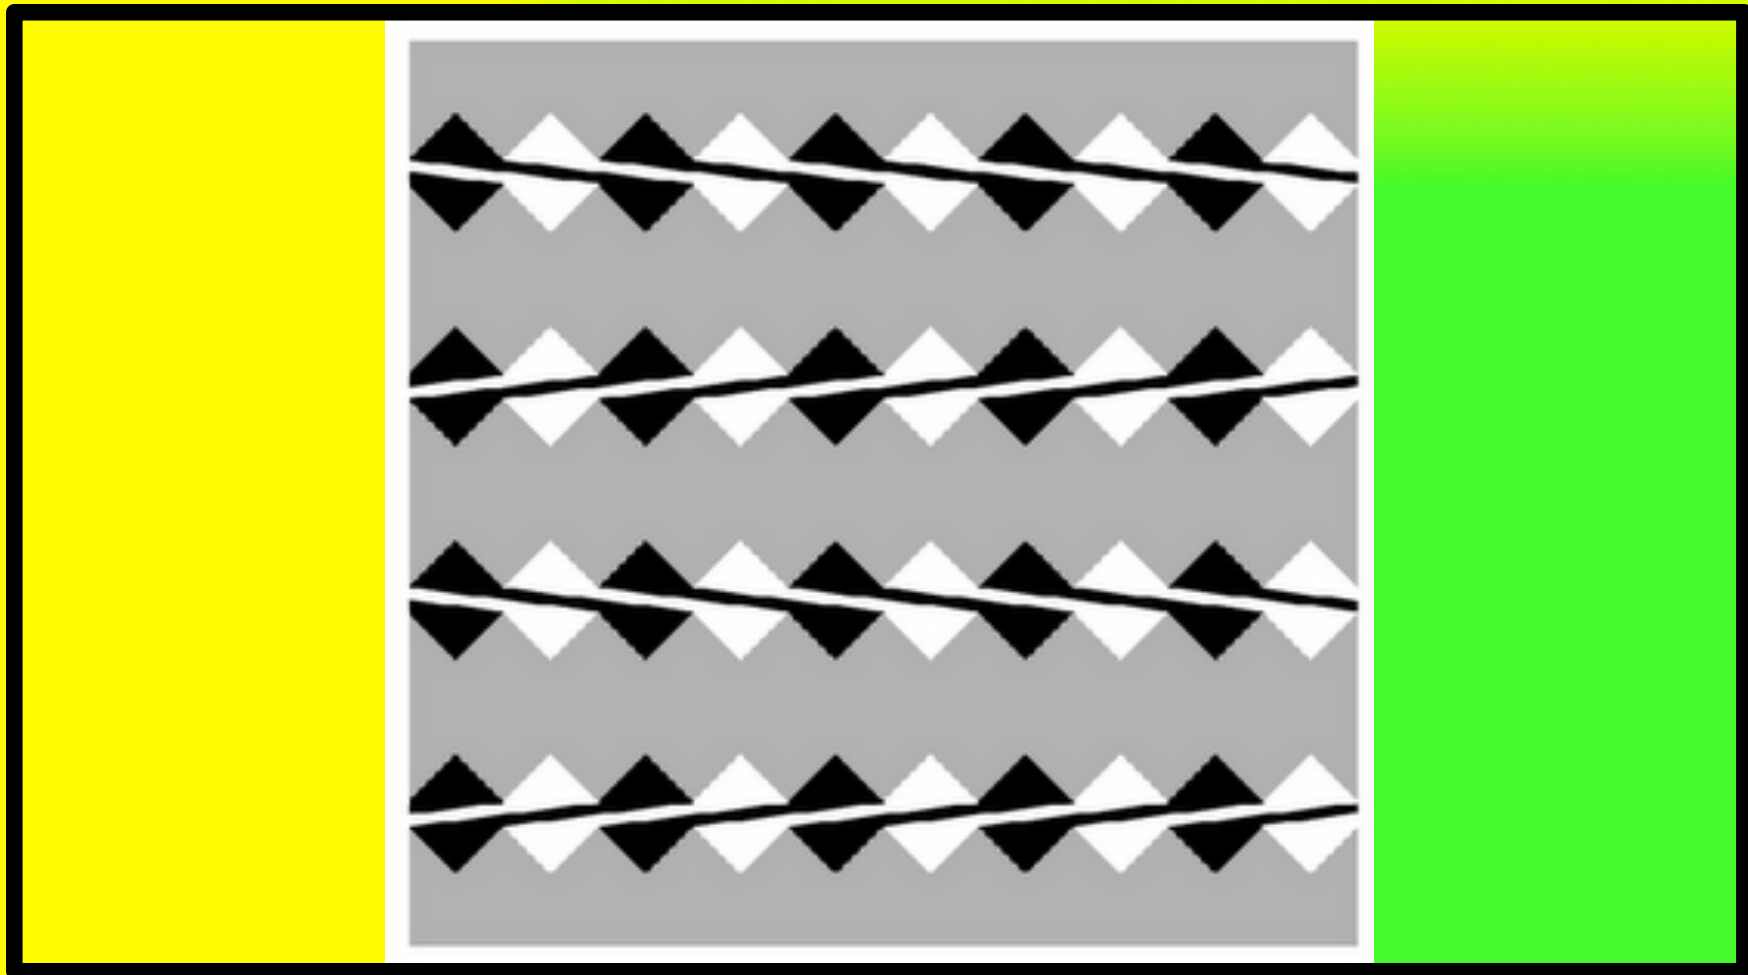

Can you see if... this a fish on a plate
or a girl's face?

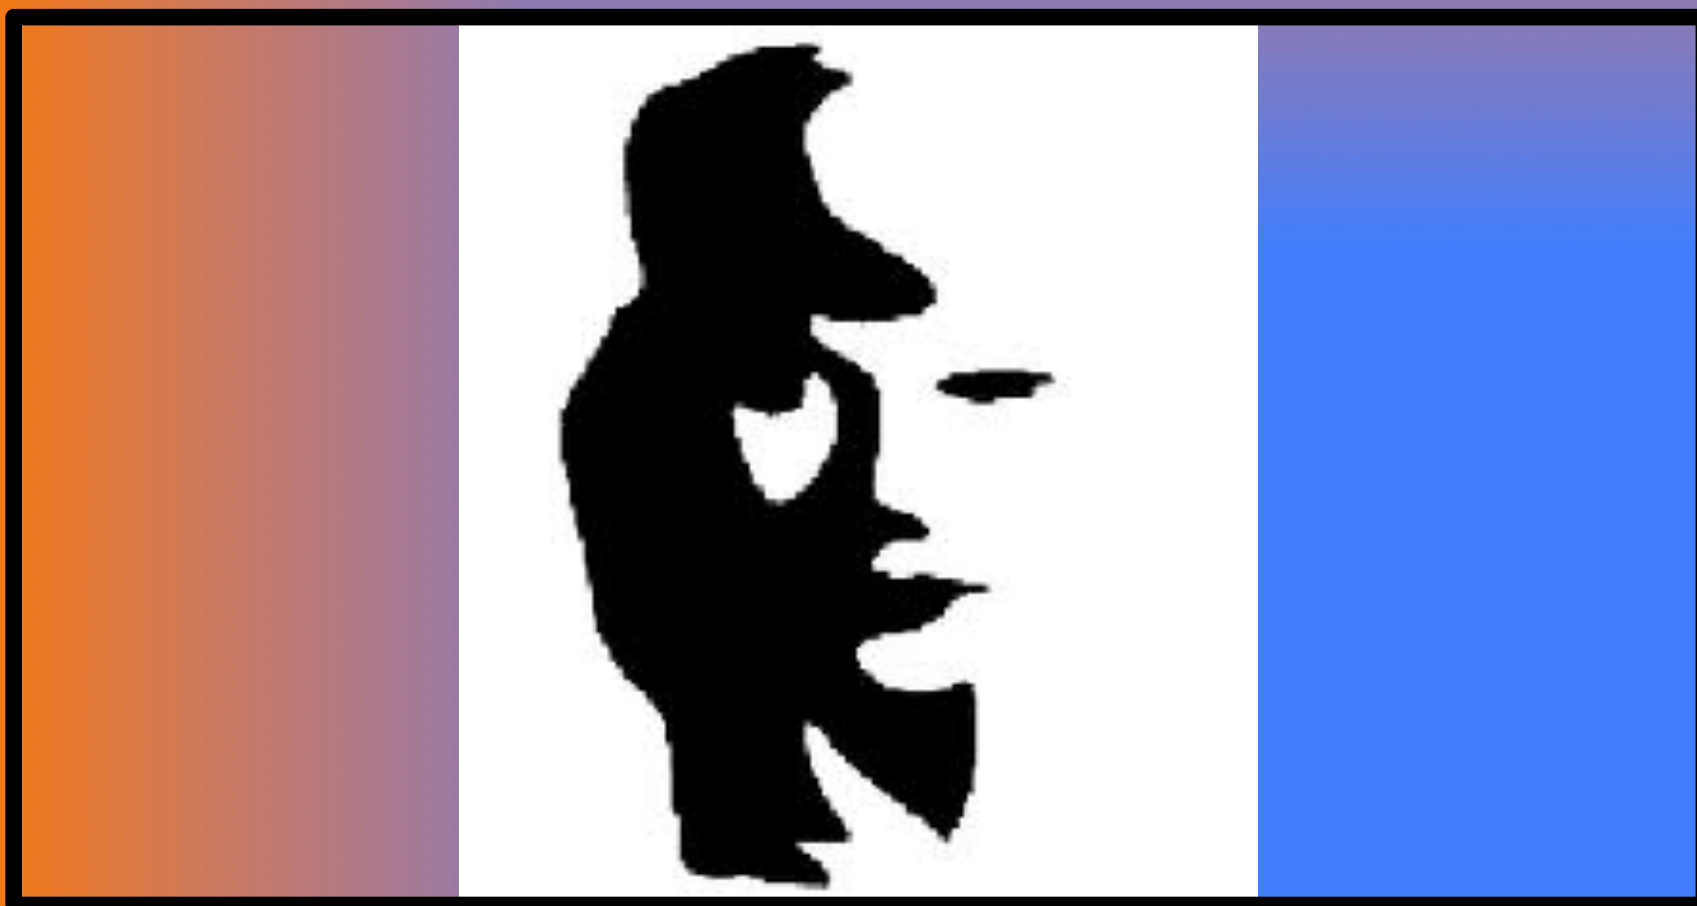

Can you see if... these lines are straight?

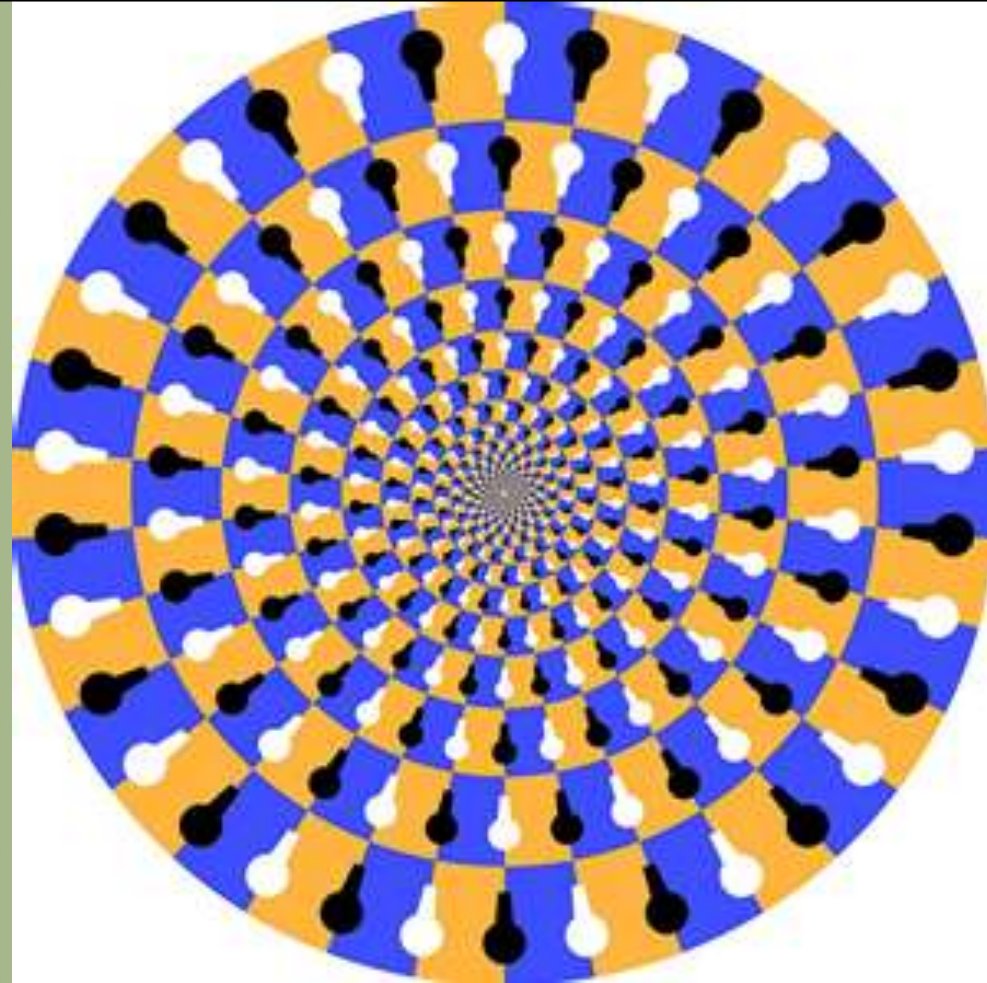

Can you see if... someone is playing a saxophone?

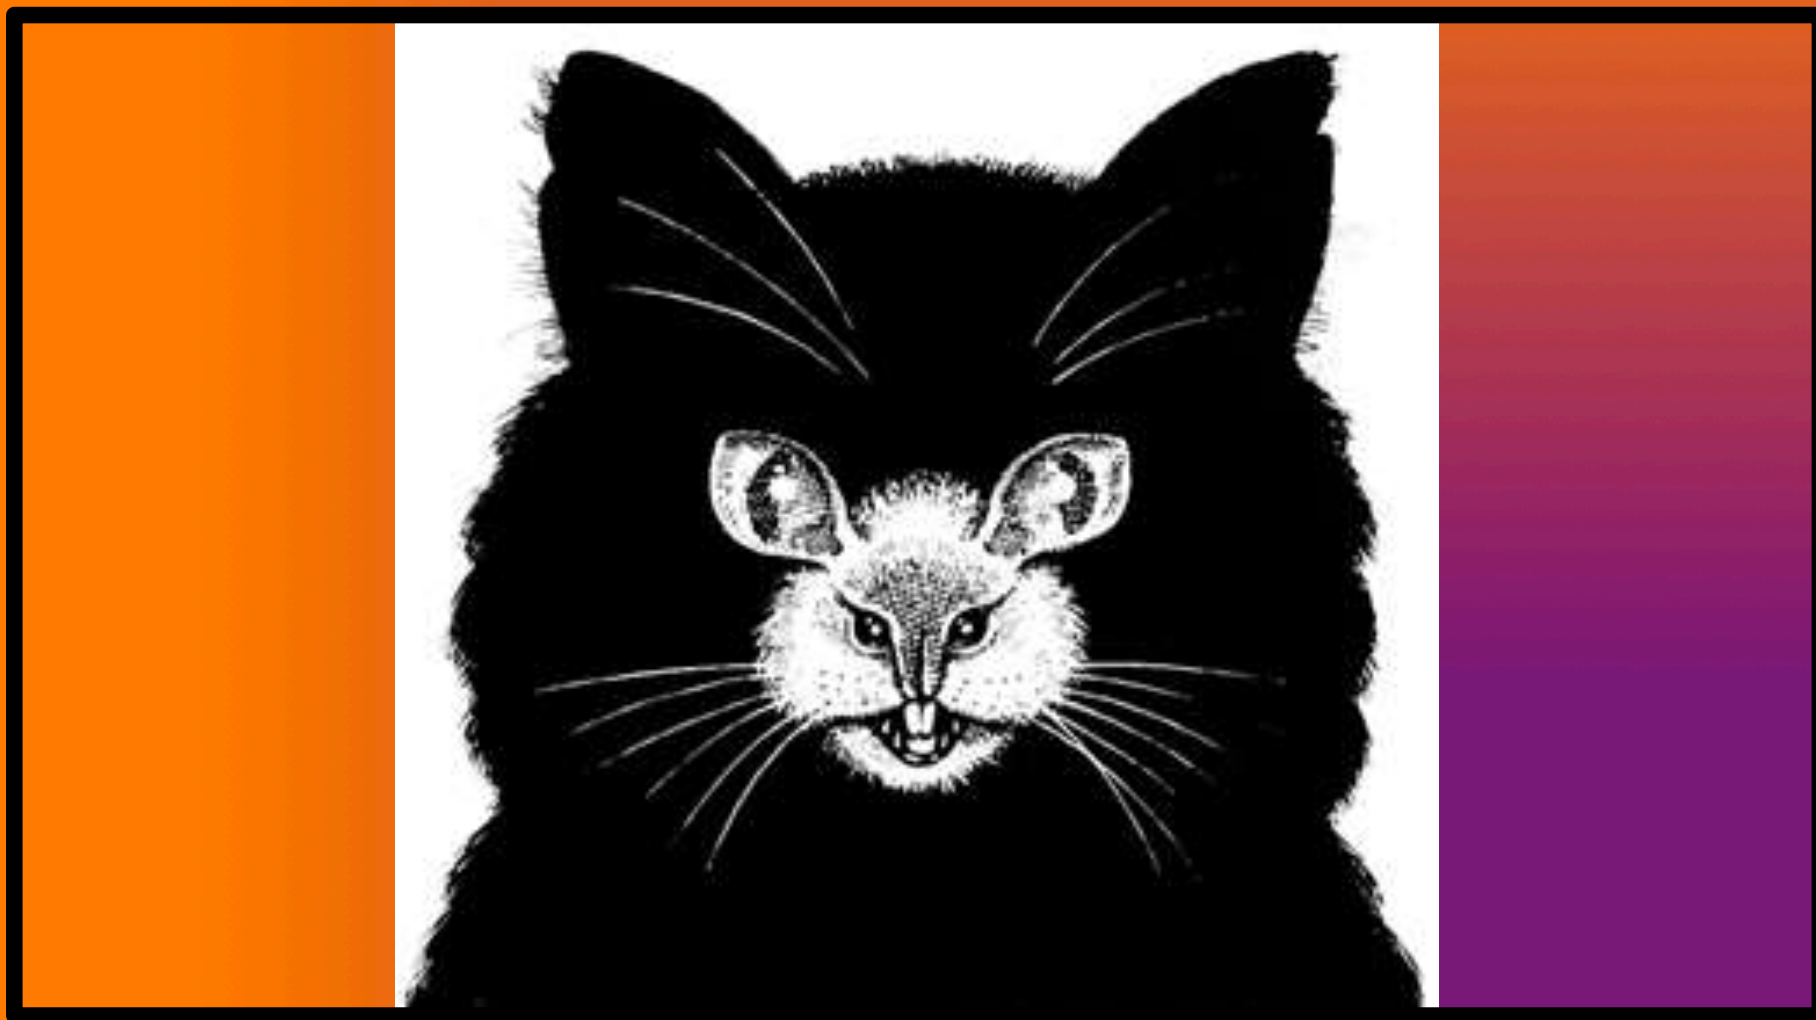

Can you see if... this shape is moving?

Can you see if... there is a mouse?

Try to say what color the word is written
in!
