# Design Football Boots of the Future

---

---

Some football players wear tracking technology that can record how fast they are running, how quick their heart is beating and where they move on the pitch.

---

Your challenge is to design new boots for football players of the future and add technology that will improve their game.

---

You might want to add a feature that will help the player to:

- run faster;
- score goals;
- avoid tripping up;
- block goals;
- pass the ball.

---

These are the football boots of the future because \_\_\_\_\_
