Inference

Inference is when the author says something without actually saying it. It is something that is implied and you must look for clues in the text to answer it. Have a look through the text and the chapters that you have been reading and create your own inference question. This can start with a how or a why and tries to show something that the author is implying.

Some examples;

How does the author infer that Matilda's parents are not nice people?

In what way does the author show that something sinister is about to happen?

Why does the author use phrases like 'couldn't help noticing' 'strangely dressed people' 'dressed in funny clothes' 'funny clothes' 'stupid new fashion' 'huddle of these weirdos' in chapter 1?
