

Monday, 28th October

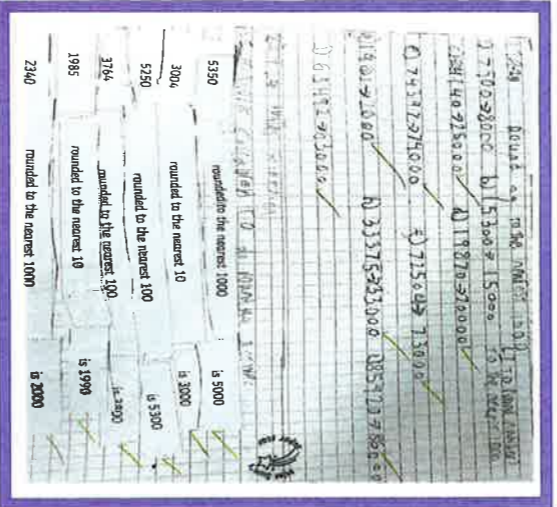

We used materials like units cubes to help us. We also used Place Value to help us round. We learned about place value a few weeks before.

We use Splash Learn as a fast finisher. We do courstours and bingo too. We got to play rounding games with friends. We got to practice our rounding up to thousands. I liked doing this.

You use rounding when using money.

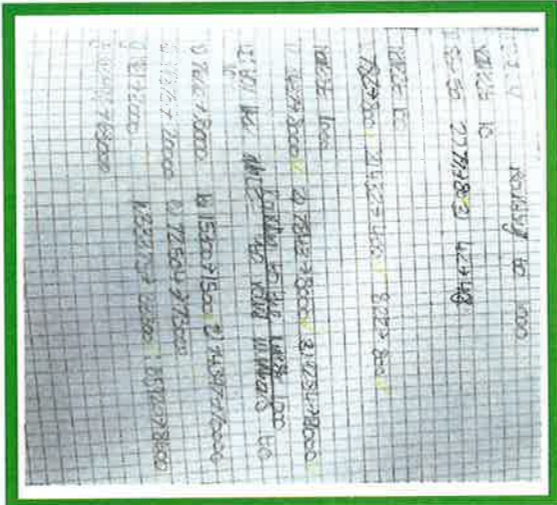

Numeracy
When we were learning about rounding we did rounding up to the nearest 10,000. $4736 \rightarrow 5000$
If it is 5-9 climb the vine, 0-4 slide to the floor. This was helpful.

Cashiers use rounding.

We can round to the nearest whole number without any decimal parts. $6.7 \rightarrow 7$
I used the rhyme to help me with this. ☺

We always do a jotted activity for maths. Sometimes Miss Sun marks our work

We used an online game called 'Rocket Rounding' you can choose what to round to. This was good as it meant I wasn't always writing in my jotted. This was a fast finisher.

or sometimes a peer. We choose someone from our group. Miss Sun writes comments, she tells us what we need to do better. I found rounding to 10000 on Friday liked the challenge.
