Science: The Human Body.

Mrs Memison and Miss Plauri taught us about the human body.

We played a matching game on the BEN @ to match body parts and their words. We worked as a class.

We needed paper, a straw and 2 balloons. We needed 2 for both lungs. The balloons pumped up when we blow in the straw.

In the doctor surgery we wore costumes and used our new words. This is a model, we don't have balloons in our body.

In Primary 2 we made a hospital to practise about the human body.

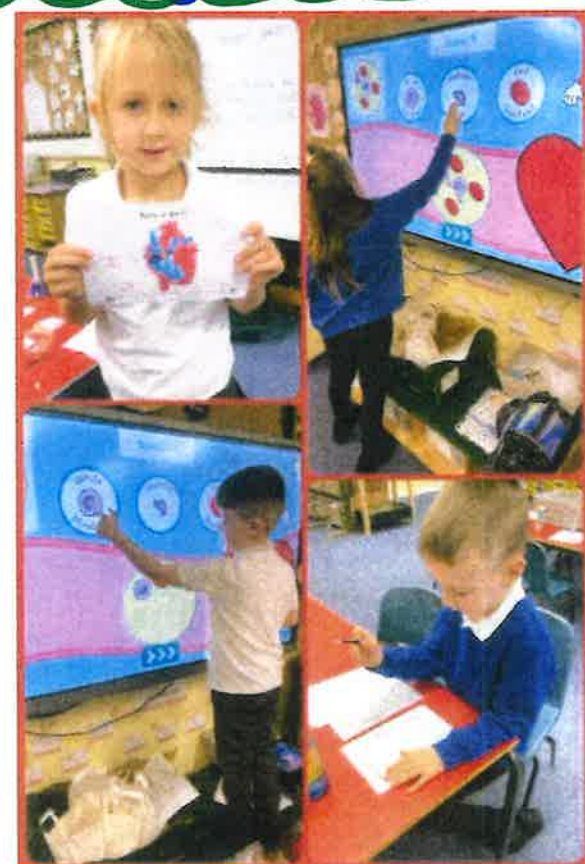

We could be nurses, doctors or patients.

This was fun to use tricky words for our bodies.

Kidneys heart lungs
brain bones small
and large intestine.

We learned all about the heart. We made a labelled diagram. We made group hearts. In class we used videos all about the digestive system. 6 out of 6 recommend this topic!

I ♥ SCIENCE!

SCIENCE IS THE BEST

17th December 2025.

VERY FUN!

Mrs Memison and Miss Plain helped to teach us spelling. We have different spelling groups in Primary 2.

Some children work with Miss Nadeem to learn spelling. We all learn differently with so we have different groups.

FUN!

With Elkanai boxes you write your words with sounds and a sentence.

Mrs H. A VA

MYIA

TO N TYI

Mrs Memison shows us how to do our words on her board.

We use jotters and magnetic boards to practise our words.

When we use our boards we must:

- Say our words
- make ones isn't enough
- blend
- read
- write.

Mrs Memison gives us a Partner to work with. Reading Eggs

Let us practise our skills. 6 children used Reading Eggs in school. 4 have done it at home.

Mrs Memison marks our spelling. ✓ correct X needs fixed.

I made a Big chart of spelling! This was FUN!

THE BEST EVER!

GOOD!

FUN!
