Digital Technology.
Noak

Mr Hornsby teaches Digital Technology skills every Tuesday.

He uses the Bend board to lead the lesson and teach the skills.

It's important to learn digital skills and how

safely use technology.

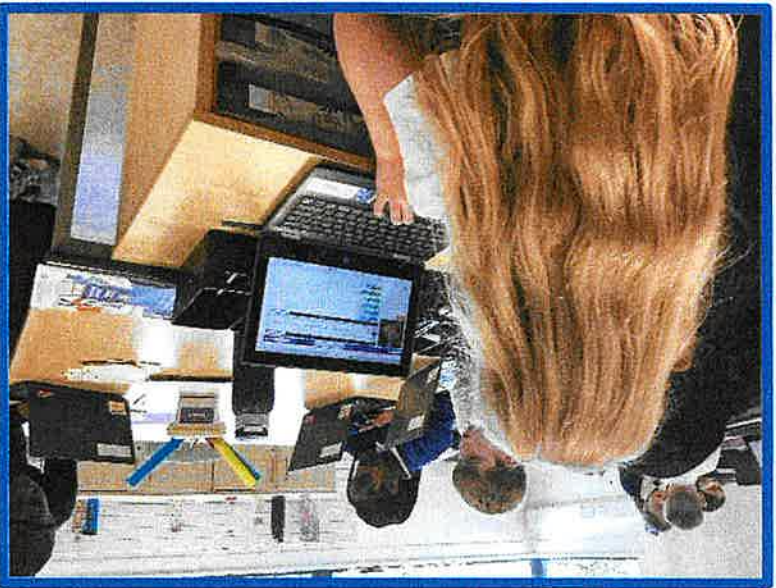

In coding you drag left from the

metal.

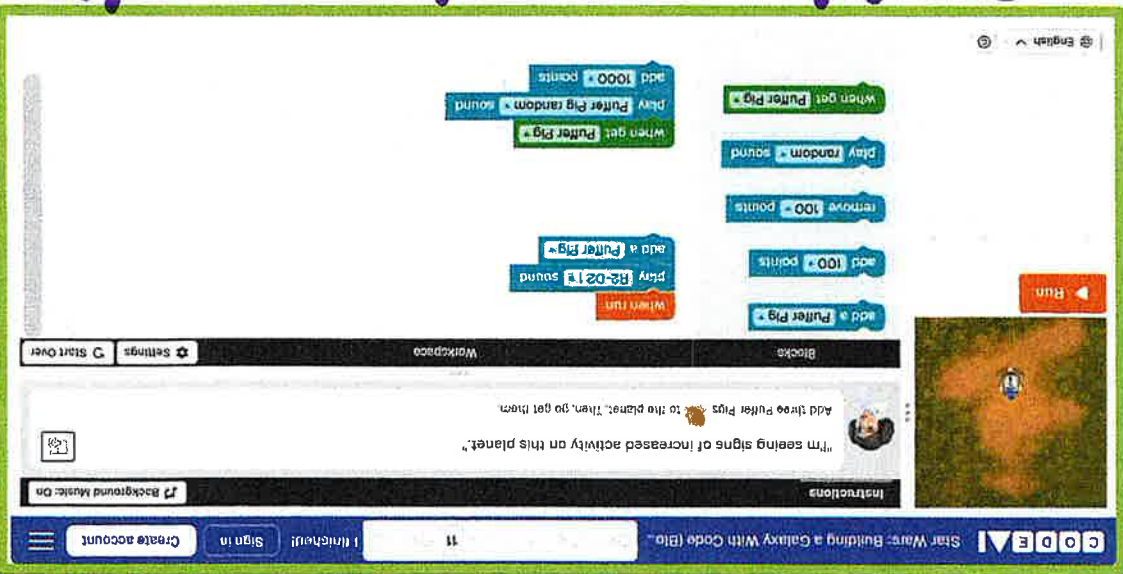

Coding means something can make by itself.

There are real life things like games that are coded.

Paint is great for drawing. You can use these in PPT.

REAL LIFE SKILLS !!

the PPT let you present information.

In Minecraft Education you are taught different digital skills. It is fun!

People online can be dangerous be

Education.

Minecraft

Paint and

learning about coding, PPT,

We have been

Every Tuesday afternoon PPT lessons help with our lesson.

My PPT is all about ME! I know how to use short cuts to add new slides and make things move.

I can use animations to make the slides move.

CONFIDENT

A bossy verb is important to clearly tell others what to do!

We talk through examples of Writing, this helps me to pick up an idea to help.

We have a target sheet to help us know what to write. It would be good to get the targets before we start Writing.

When we did our own instructions on making a jam sandwich, we really made one. It was fun!

Mr Hornsby will tell us if we have done well with our writing. He ticks good parts and pink errors.

Taught Writing.

Instructional writing is following steps to guide you with what you want to do. Like a recipe.

EXCITED

NERVOUS.

GOOD

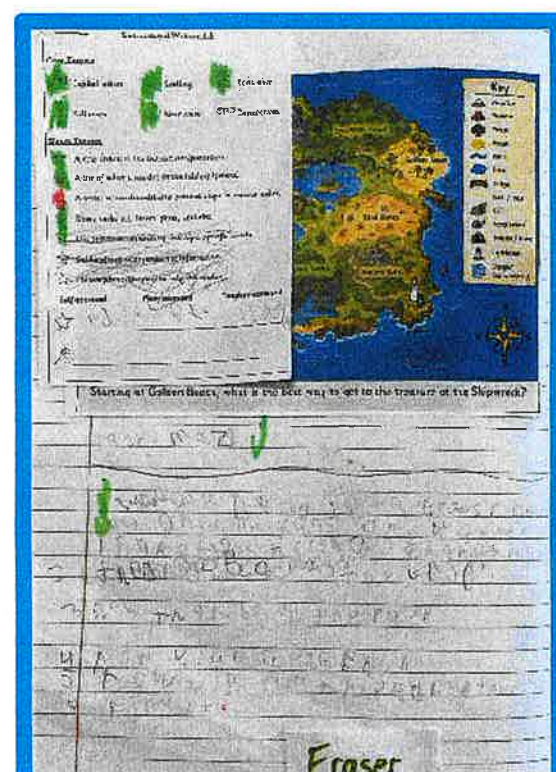

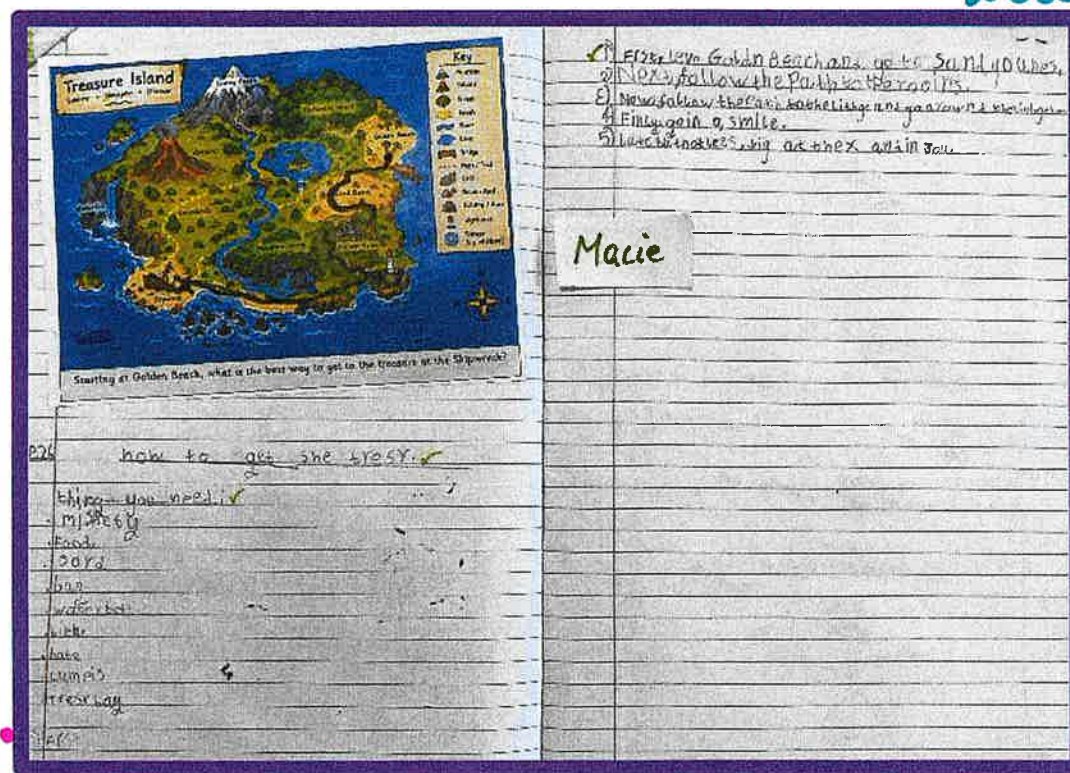

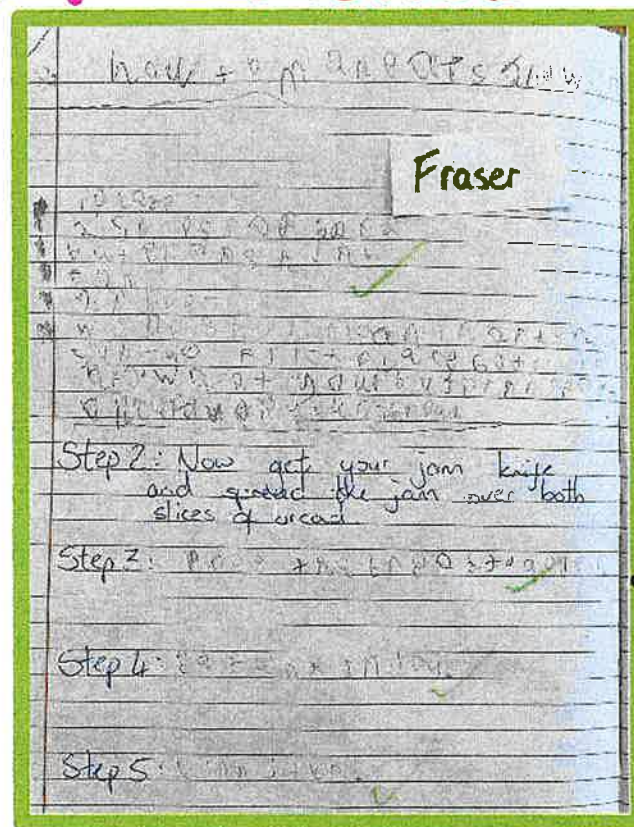

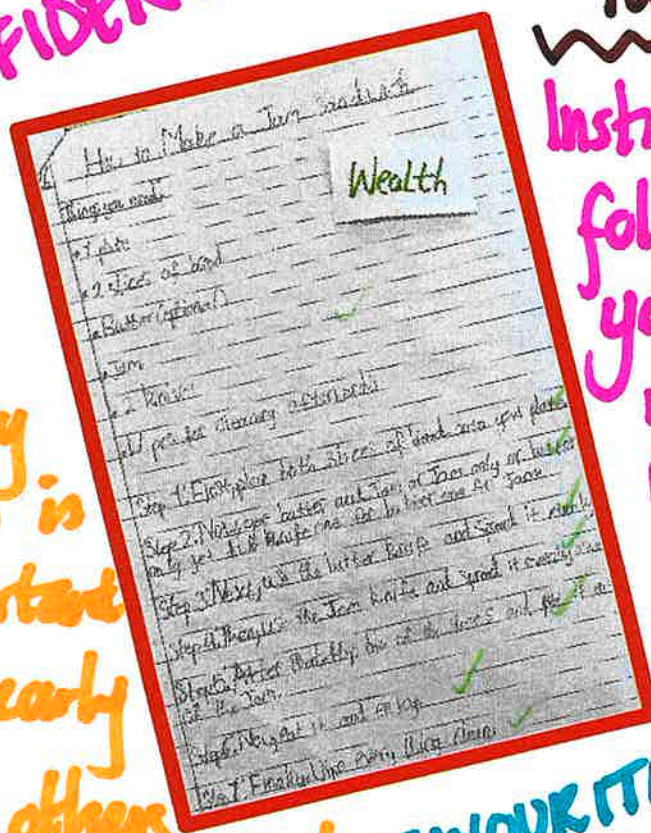

Mr Hornsby teaches Taught Writing on a Thursday. The whole class does the same. We see our Learning Intention on the

smartboard.

We answer questions and plan together.

We have used directions for how to get to a ship wreck.

Any corrections are pink. We don't need to fix the mistakes. Star Writers are given most times for Writing. We get a certificate home to keep. We want to mark each others work.

FUN
