

# Silly string

13th May 2020

National  
Numeracy  
Day

## What you will need:

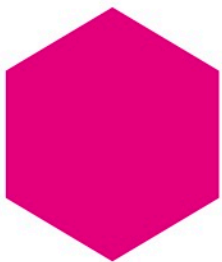

- A ball of string or a long rope
- Imagination

All players should stand in a circle and hold on to the string or rope with both hands, with one person holding on to each end of the rope to make a closed circle.

Nominate someone different each time to call out a shape so that the whole group has to move the string or rope into position to make that shape.

Here are some shapes to get you going:

**Hexagon**

**Square**

**Heart**

**Star**

**Rectangle**

Finding it too easy? Try to create different shapes without talking, or try it blindfolded!

What did everyone like or dislike about this activity?
