

Staying at Home Story

Sometimes people get sick and feel really unwell.

When we are not well, we could spread the bad germs and make other people feel unwell too.

This is why it is a good idea to stay at home when we are not feeling well.

This will stop other people from getting sick too.

Lots of people are feeling unwell all over the world just now.

When there are lots of people who are unwell it is not a good idea to go to places like soft play or swimming pools.

There will be lots of bad germs at these places.

My Mum and Dad might tell me I have to stay in the house. They will ask me to do this so I stay safe and don't catch other people's bad germs.

When I'm at home I get to play with my own toys and stay safe too.
