

Focus for Learning

Aug-Oct Primary 6

Topic

Our topic this term is Climate Change and will encourage the children to develop an understanding of the reasons why the rising temperature of our planet is a concern. They will learn about how world leaders are trying to combat this and how they can contribute to the recovery of the damage to the ozone layer.

We will study alternative energy sources for our planet and what is meant by reducing our 'carbon footprint'.

We will link our topic with drama and music, in addition to writing reports on specific aspects of global warming.
