

## Stepps Primary School – drainage remedial works

### Progress update December 2021

Junior Wing remediation works are progressing well, the contractors remain confident of completing all works and leaving site early in the new year. As soon as the council is provided with a firm completion date, we will relay this information to the school community

The illustration below demonstrates the site set-up still in place at the school. It should be noted that the contractor's secured work area at the front of the school has now been reduced to allow access and egress to the main entrance from both sides of the pond area.

The contractors continue to access the junior wing from their compound located within the hockey fields via a secure, fenced access route. They will continue to facilitate access within the playground, through the secure areas in the morning and at the end of the school day to allow school children to access the rear playground as normal.

Works are not anticipated to cause nuisance to any adjacent residential properties. However, if you have any concerns, please contact the number below.

Luddon Construction - Head Office 0141 945 2233
