

# Home Learning Advice for Parents

The following are just some ideas to support responsibility whilst staying at home. Your child's school website or glow page will have many more.

## Early Level: Responsibility

### Glitter germs activity

For this hand washing activity, you'll need lotion and glitter. First, place a small dab of lotion in a bowl. Next, add some glitter. Finally, mix it and then spread it on your little one's hands. Explain that the glitter is like the germs and allergens that we pick up as we go throughout the day. The best way to get them off is by washing our hands.

### Easy Homemade Soap Making

This is an easy to do craft, for children ages 4 and up. However, because heat and cutting are involved, parental supervision is recommended.

A list of things you need and how to do it can be found [here](#):

### Being responsible in my home

How many toys can I pick up before the song runs out?

Play the 'tidy up' song and encourage your child to tidy up as many toys as they can, before the end of the [song](#).

After playing a few times, try making the game more difficult by setting targets for how many toys your child can tidy up.

### Staying far away from people: what does 2m look like to you?

Explain to your child about social distancing and why it is important.

[Here is a video](#) which helps children understand what 2 metres looks like.

Physically showing what two metres looks like can help children understand how far away they need to be from other people. For example:-

- Asking your child to guess what 2m looks like and then measure
- Using something visual can help too: a broom, a 2m dog leash, or even by showing the amount of steps an individual has to take to be two metres away.
- Drawing a hopscotch design with chalk can also be a good way to show how long 2 metres is.
- Reminding children that it is not just 2 metres in front, it has to be 2 metres in every direction.
