

# Ladder Letters

## Phonics Skills

L.I – I am learning to identify and pronounce phonemes

L.I – I am learning to read a variety of common words

## Physical Skills

L.I – I am able to perform 2 footed jumps with a safe landing technique

L.I – I am able to perform a safe and accurate underarm throw

You will need: - chalk/masking tape, phoneme/word cards, stone/beanbag

## How to Play

- Create a ladder using chalk or masking tape. The ladder can be straight or curved and as long as you like.

- Chalk the target phonemes or words into the rungs of your ladder (*if using the resource cards place them to the side of each space to prevent slipping*).
- Jump with both feet together up the ladder. As you land on each phoneme/word shout it out. You cannot move on until you have called out the phoneme/word (if you need help, ask a grown up).
- For more challenge to the game add a time element. For example, how far up the ladder can you get in 20 seconds? You could time how long it takes to complete the whole ladder and try to beat this time.

## Game 2

- This time throw a stone or beanbag up the ladder and jump up to the phoneme/word it has landed on before shouting it out. Then collect the stone or beanbag before jumping back down the ladder.
- You could ask someone to give you a phoneme/word to try to throw the stone or beanbag onto. This will help to improve your throwing technique.

Have fun learning and keeping fit!
