

P2/3 October Newsletter

★ ★ The children have settled really well into Primary 2/3 and are making great progress.

They have been working hard to develop their confidence and independence when completing tasks. They are also trying hard to improve the pace of their work and we are delighted with their efforts.

The children are benefitting from our soft start each morning. This short time each morning, allows the children to settle in, order their lunch, complete their emotional check in and have a chat and a play with their peers and their teacher. ★ ★

The children will continue to learn about friendship and kindness during HWB and they will have plenty of opportunities to work together and further develop their relationships.

The children will be learning about food and healthy lifestyles within HWB.

Literacy

Our reading focus this term is fluency and accuracy. Please practise your child's book or wordlist at home and encourage them to read for enjoyment.

They will be working on their independent writing skills with a focus on writing a beginning, middle and end and using punctuation correctly. The children will be writing recounts and persuasive texts this term.

Good phonological awareness and a range of spelling strategies will increase their confidence when creating texts. Please help your child to practise their spelling and phonics words each week.

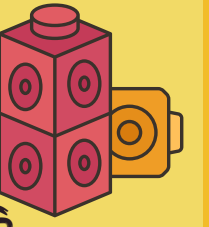

Maths and Numeracy

The children are learning to count, read, write and order numbers and we will regularly revise this throughout the year. They will continue to practise their skills counting in multiples of 2, 5 and 10.

This term they will learn to solve addition and subtraction calculations using concrete materials, pictorial representations and mental strategies. Please help your child to practise the 'Basic Facts' on their homework sheet to help develop their mental agility.

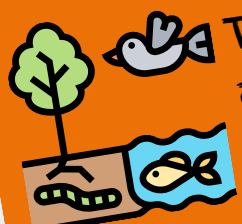

The children participate enthusiastically during our Number Talks activities. Number Talks allow children to build number sense, mental maths and flexibility with numbers. This term we will focus on addition using Doubles and Near Doubles.

Science

The children really enjoyed learning about the sun and the moon.

They will learn about living things.

They will develop their expressive skills during Art, Music and Drama lessons and they will be performing live for you at the Christmas Show!

During play and Outdoor Learning the children will be learning to collaborate, communicate and problem solve.

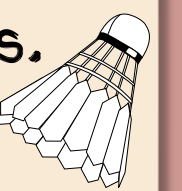

Dates for your Diary

- Christmas Fayre 29.11.25
- Christmas Show 10.12.25-11.12.25
