

**APPRENTICESHIP PROGRAMME 2014
UK WIDE LOCATIONS
CIRCA £9,000 PLUS EXCELLENT BENEFITS**

We're one of the most diverse energy companies in the industry, with a range of different businesses serving different purposes. We are looking to recruit talented people for our 2014 programme offering electrical, mechanical, maintenance and power engineering apprenticeships.

You'll have fun and, more importantly, you won't just earn qualifications and great rewards, you'll also get practical working experience and all our support for your progression.

Whichever apprenticeship you choose, you'll have the opportunity to achieve a recognised qualification, City & Guilds Technical Certificate and NVQ (or SVQ in Scotland) level 2 or 3.

Many of our senior managers and directors started as apprentices and so becoming an apprentice could be the first step in your future career development.

You should have, or expect to achieve, 4 GCSE / Standard Grade passes (C / 3 or above), including English, Maths, and a Science or Craft subject. Successful applicants will be asked to supply copies of their certificates.

Your hobbies or interests should demonstrate an interest or passion relating to our industry and you should live within easy commuting distance of one of our sites.

The closing date for applications is 7 March 2014, with successful applicants due to start their apprenticeships in August 2014.

Visit our website www.sse.com/careers for further information, real life success stories and the opportunity to apply.

If you are invited to participate in our selection process, assessments may be held regionally between 31 March 2014 and 17 April 2014, with interviews taking place between May 2014 and June 2014.

Successful candidates will be subject to the company Vetting & Verification process which includes a basic criminal record check.
