

School Strategic Plan for Fairview School 2019-2021

Purpose

This is Fairview's first 3-year strategic plan and its purpose is to set out and communicate our vision, ethos and long-term direction for the school regarding Family learning and Engagement so that we are all clear on where we are going and what we are trying to achieve in the period up to 2021. It has taken into account all key stakeholders in the school, including pupils, parents, and staff. This plan is a real team effort and the culmination of a long consultation process involving parents, children and staff. It is a working document, which sets out a range of goals, actions and priorities; we will use it to inform our day-to-day work, judge our progress and help us to decide how to improve Family Learning at Fairview.

Our strategy for the next 3 years is clear and aspirational, but it will not prevent us from taking advantage of any new opportunities that might arise to continue the amazing work staff already do. We are proud of the school's achievements and values and it is our intention to provide pupils and their families the best opportunities to expand their learning together.

Vision Values & Aims

Vision

Fairview School is passionate about learning, achievement and enjoyment for all. We will work in partnership, challenging ourselves to improve and innovate to meet the individual needs of children and young people with complex and enduring needs, in an ever-changing world.

Aims

We aim to

- ☐ To provide a bright, stimulating, communication friendly and nurturing environment which
