

“Reading Around the Subjects”
BGE Reading List Session 20-21

Crieff High School Broad General Education (S1, S2, S3) - "Reading to Enhance Your Subject Knowledge"

Becoming a **stronger reader** is the number one way to become a **stronger learner**. We would like to encourage our S1 – S3 pupils to “read around” their favourite subjects to strengthen both their **literacy** and their **subject knowledge**. The following books and links have been recommended by subject specialists to encourage wider reading in their subject.

Art and Design:

For Art and Design the link to our Pinterest page for all years is very useful for the pupils generating ideas for their work.

<https://www.pinterest.co.uk/mairijohnstone5711/boards/>

CDT:

We would recommend the BBC Bitesize website for getting pupils thinking about our subject:

<https://www.bbc.co.uk/bitesize/topics/z3ngjxs/resources/1>

Drama:

<p>1. <i>33 Short Comedy Plays for Teens: Plays for Small Casts</i> Titles include: Crazy Hair Day, Flavor of the Week, Juliet Tryouts, Tornado Drill and Chatterbox.</p>	
<p>2. <i>Theseus and the Minotaur - Myths and Legends</i> by Graeme Davis</p> <p>Graeme Davis draws upon the classic sources to retell the great myths and legends of</p>	

Theseus, the founder-king of Athens, and backs this narrative with a factual examination of the myth, its variations, and its development over time.

3. *The Curious Incident of the Dog in the Night-Time* (play)
by Simon Stephens

A murder mystery like no other, this novel features Christopher Boone, a 15 year-old who suffers from Asperger's syndrome. When he finds a neighbour's dog murdered, he sets out on a journey which will turn his whole world upside down.

Recommended for S3 and up

4. *The Boy in the Striped Pyjamas* (stage version)
By John Boyne
Adapted by Angus Jackson

Bruno has a friend called Shmuel. Like Bruno, Shmuel is nine years old. Their birthdays are on the same day. But Shmuel lives on the other side of a fence, and he's always wearing striped pyjamas...Based on the best-selling novel by John Boyne, *The Boy in the Striped Pyjamas* is a heart-wrenching tale of an unlikely friendship between two innocent boys.

5. *National Theatre: All About Theatre*

Described by **Benedict Cumberbatch** as 'a brilliant introduction to theatre', this fascinating book by the National Theatre shows how plays like *War Horse* and many others are made.

6. *Introduction to Theatre Arts: Student Handbook: A 36-week Action Handbook Paperback – Student Edition, 1 Aug. 2003* by Suzi Zimmerman

At last! -- a student-friendly, teacher-friendly workbook with study units for an entire year of classroom drama activities. The entire spectrum of theatre is covered in ten sections: Getting started; Evaluation; Scene work; Acting; Characterisation; Publicity and other production business; Play production; Theatre history; Games and improvisation; Planning for the future.

English:

Help your Kids with Spelling and Grammar by Carol Vorderman.

This excellent grammar book covers all the basics and is colourfully illustrated. This book is suitable for young people as well as parents.

What's so Special about Shakespeare by Michael Rosen. This is a lively and accessible book on the life and works of William Shakespeare by award-winning author Michael Rosen.

In *“The Stories of English”* linguist David Crystal writes brilliantly about the evolving English Language (suitable for confident readers)

“A Velocity of Being: Letters to a Young Reader” edited by Maria Popova and Claire Bedrick is a compendium of writing about the joys of reading.

“Learning How to Learn” By Barbara Oakley is an engaging guide for teens on how to study effectively, grounded in neuroscience.

“Dyslexia is my Superpower” by Margaret Rooke uses more than 100 interviews with children and young adults where they reveal their personal tips and tactics for honing the creative benefits of dyslexia, enabling them to thrive in school and beyond. An inspiring read for young people with dyslexia.

Dyslexia: A Teenager's Guide by Dr Sylvia Moody helps young adults tackle problems associated with their dyslexia with strategies uniquely suited to their needs. Clearly and simply written by a leading expert in the field, the book helps with reading, writing, spelling and memory, as well as giving tips on how to take notes, organise study, deal with examinations and use IT. It also shows how to improve confidence, deal with stress, and build on the creative talent that many dyslexics possess.

The Scottish Book Trust has lots of excellent reading recommendations for young people between the ages of 12-14:

Reading Around Home Economics:

One of the best ways to increase your knowledge of practical food is to browse through recipe books. They provide inspiration for practical creativity. We could not begin to provide a definitive list as creativity in the kitchen can be a very personal and individual activity, or a fun time with friends!

The best way to start is simply visit the cookery section in the library and see what you are drawn to.

- For fans of “The Great British Bake Off” anything by Mary Berry or Paul Hollywood is a must. Also explore the range of cake decorating books available – wow!!!
- For those of you who are eco-aware, anything by Hugh Fearnley-Whittingstall is a must. He writes great recipes based around sustainability and local produce. Saving the planet one mouthful at a time – yum!
- For those of you who enjoy foreign travel, the options are endless. I am currently exploring Middle Eastern cuisine and have found Yotam Ottolenghi to be a particularly interesting author.

- For those of you who are interested in current trends, Clean Eating is very topical. “Deliciously Ella” is a very accessible book – some authors of “diet” books can be a bit regimented and proscriptive in their approach – this suggests rather than dictates.
- For those toying with the idea of reducing their intake of animal produce - whether for health, ethical or environmental reasons – there are many books on vegetarianism and veganism.
- Planning on university? Explore cookery books for those on a budget, such as “The Credit Crunch Cookbook”.
- Finally “Meal in a Mug” – all you need is a mug and a microwave to make cakes, curries and everything in-between. Love it!

Guilia Enders - Gut: the inside story of our Body’s Most Underrated Organ is not a recipe book, but I loved it. Aimed more at seniors who are interested in medicine, microbiology, dietetics etc.

Miss McCully has also suggested a few of her current favourites:

- Marcus Wearing – New Classics
- Marcus Wearing – Marcus Everyday

There are also lots of fantastic websites out there which allow you to keep up-to-date with developments in Food & Nutrition. Some of our favourites are:

<https://www.foodafactoflife.org.uk/>

The brilliant thing about this website is that the information and resources are divided into different age groups, so if you decide to explore a new topic, you can start basic, and then move on as you feel ready. Recipes, videos, skills development – it has it all.

<https://www.bbcgoodfood.com/>

Recipes galore categorised by level of difficulty, cost, ingredient and time needed.

<https://www.rhet.org.uk/>

Interesting resources linked to Scottish Farming.

<https://pinchofnom.com/>

We wouldn't normally recommend "Diet Books", but this site is much more than that – tips and information on healthy eating.

<https://www.recipetineats.com/>

Miss McCully has recommended this Blog – quick, tasty recipes using storecupboard ingredients.

<https://scotland.lovefoodhatewaste.com/>

This website does exactly what it says on the tin! Provides lots of information and ideas for reducing food waste. Save the planet, save the pennies and enjoy great food!

<https://www.greenpeace.org.uk/>

Now whilst some people may disagree with Environmental Activism, Greenpeace is still a fantastic source of information on food sustainability, over-production of some foods and the overfishing of our seas, to name just a few topics.

<https://www.qmscotland.co.uk/>

Discover more about the fantastic red meat produced by Scottish Farmers. The section on Health & Education is probably the best place to start.

<https://www.vegsoc.org/>

Lots of information on vegetarianism.

<https://www.vegansociety.com/>

If you are a vegan – make sure that you are knowledgeable and skilled.

<https://www.gardenersworld.com/>

Firstly – I am no gardener; however, I do grow my own herbs and dabble with vegetables. If any of you are interested in growing your own food – sustainable, local, inexpensive and good exercise both physically and mentally, then I am assured this is the site for you. A fellow CHS teacher, and keen gardener recommended it – I have had a quick look and there is lots on developing a vegetable garden from scratch. I also found the information on wildlife gardening very interesting.

We hope you enjoy perusing some of these websites and books - Miss McCully and myself certainly do, and if you do cook something amazing, or grow your own vegetables – please let us know. We love pictures as we can tweet them!

Take care and have fun!

Mathematics

Hidden Figures (Young Reader's Edition) by Margot Lee Shetterly

Before Yuri Gagarin orbited the earth, or Neil Armstrong walked on the moon, a group of dedicated female mathematicians known as "human computers" used pencils, slide rules, and adding machines to calculate the numbers that would launch rockets, and astronauts, into space.

This book brings to life the stories of Dorothy Vaughan, Mary Jackson, Katherine Johnson, and Christine Darden, who lived through the Civil Rights era, the Space Race, the Cold War, and the movement for gender equality, and whose work forever changed the face of NASA and the country.

The Number Devil: A Mathematical Adventure by Hans Magnus Enzensberger

Twelve-year-old Robert hates his maths teacher: he sets his class boring problems and won't let them use their calculators. Then in his dreams Robert meets the Number Devil, who brings the subject magically to life, illustrating with wit and charm a world in which numbers can amaze and fascinate, where maths is nothing like the dreary, difficult process that so many of us dread. The Number Devil knows how to make maths devilishly simple.

Weird Maths by David Darling and Agnijo Banerjee

Is anything truly random? Does infinity actually exist? Could we ever see into other dimensions?

In this delightful journey of discovery, David Darling and extraordinary child prodigy Agnijo Banerjee draw connections between the cutting edge of modern maths and life as we understand it, delving into the strange – would we like alien music? – and venturing out on quests to consider the existence of free will and the fantastical future of quantum computers. Packed with puzzles and paradoxes, mind-bending concepts and surprising solutions, this is for anyone who wants life's questions answered – even those you never thought to ask.

Murderous Maths Books – series by Kjartan Poskitt

There are ten books in the Series and an accompanying website <http://www.murderousmaths.co.uk/>

The Simpsons and their Mathematical Secrets – Simon Singh

You may have watched hundreds of episodes of *The Simpsons* without ever realising that they contain enough maths to form an entire university course. In *The Simpsons and Their Mathematical Secrets*, Simon Singh explains how the brilliant writers, some of the mathematicians, have smuggled in mathematical jokes throughout the cartoon's twenty-five year history, exploring everything from Mersenne primes, from Euler's equation to the unsolved riddle of P vs. NP, from perfect numbers to narcissistic numbers, and much more.

Alex's Adventures in Numberland – Alex Bellos

The world of maths can seem mind-boggling, irrelevant and, let's face it, boring. This groundbreaking book reclaims maths from the geeks. Mathematical ideas underpin just about everything in our lives: from the surprising geometry of the 50p piece to how probability can help you win in any casino. In search of weird and wonderful mathematical phenomena, Alex Bellos travels across the globe and meets the world's fastest mental calculators in Germany and a startlingly numerate chimpanzee in Japan.

What's the Point of Maths? – DK Children

This book unpacks how maths is an essential part of our everyday life in ways that you never thought of. Crazy facts, magic tricks, mathematical brainteasers and beautiful illustrations show you that maths is interesting, fun, and unintimidating! Ever wondered where maths originated from? This fantastic educational book unpacks all the curious questions that you may

have about mathematics including intriguing historical stories that explore the often-surprising origins of maths that we use in our daily lives.

Learn about how the formation of number sequences began, to the origins of trigonometry and find out how to become a trillionaire! Maths in our daily lives is used in many things that might not even seem that obvious.

The Man Who Counted – A Collection of Mathematical Adventures – Malba Tahan, Leslie Clark and Alastair Reid

The adventures of Beremiz Samir, The Man Who Counted, take the reader on a journey in which, time and again, Samir summons his extraordinary mathematical powers to settle disputes, give wise advice, overcome dangerous enemies, and win for himself fame, fortune, and rich rewards. We learn of previous mathematicians and come to admire Samir's wisdom and patience. In the grace of Tahan's telling, these stories hold unusual delights for the reader."
