

Information for Parents and Students during the COVID -19 Outbreak

- If your child is asked to stay home because they have been in contact with a confirmed case at school, other household members do not need to self-isolate providing all household members are well.
- Siblings can continue to attend school if they have not been identified as a close contact and no one in the household is unwell.
- If your child develops symptoms of COVID-19, they must not go to school.
- You should arrange for your child to be tested and all household members should stay at home during this time.
- If the test is positive your child should remain at home for at least 10 days from the date when their symptoms appeared. All other household members must stay at home and not leave the house for 14 days.
- If you have any concerns about your child going back, you should contact their headteacher (if your child is in Primary school) or Depute Headteacher or Guidance Teacher (if your child is in Secondary school) to discuss this.
