

Notice numbers!

- * Talk about numbers around you: doors, buses, in the supermarket ...
- * Count everything: steps, plates, buttons, socks ...
- * Sing number rhymes
- * Play board games, snap, number puzzles ...

Look at the number
on that bus!
That's a number

Can you count how
many rainbows we see
in people's windows
on our walk?

How many fingers?

Let's count
these steps.
1,2,3

This will help your child:

- * To understand that finding out about numbers is exciting and fun, and part of finding out about the world around them
- * To see numbers in real life and use real materials as they count
- * To say the numbers out loud and practise getting them in the right order
