

## Welcome

Welcome to the October edition of the Promethean Scotland Newsletter.

## Teacher Tailgate

Teacher Tailgate 2024 was another success! Open to participants from all over the world, the sessions were recorded and have been shared on [Learn.Prometheanworld.com](https://Learn.Prometheanworld.com) for anyone to access. Well worth a watch to get some great ideas for using your ActivPanel and software! Why not have a watch [here!](#)

## October Resources

October is a busy week for various events and key dates. From World Smile Day, Harvest Festival, Halloween, Recycle week, Black History Month, World Space Week and more!

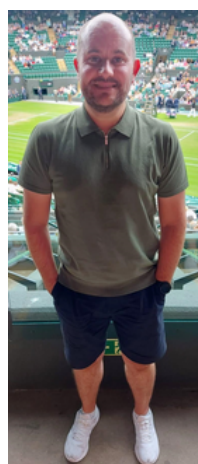

[one.prometheanworld.com/resource-library](https://one.prometheanworld.com/resource-library) has resources to support these topics and more! To help you get started, click the images to the right for some ActivInspire lesson ideas.

## Certified Trainers Spotlight

### Jonathan Hull

Principal Teacher: Equity (Digital Inclusion) for East Renfrewshire Council

Promethean Top Tip:  
Don't get in a spin with Spinners! Take them with you by signing up to [one.promethean.com](https://one.promethean.com).

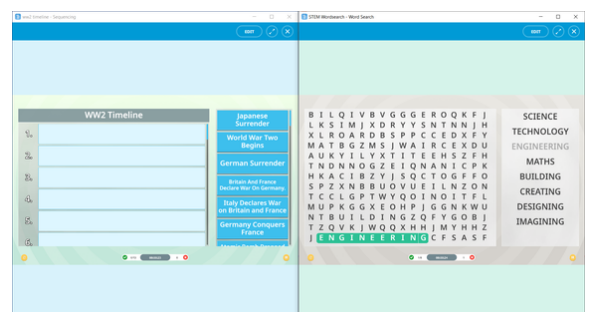

### Amanda Pickard

Digital Development Officer, South Ayrshire Council

Promethean Top Tip:  
Create 2 activities in ActivInspire and play them side by side on your ActivPanel

If you don't have an ActivPanel 9 with the roaming profile, you could use the Promethean Web Applications instead! Find out more [here](#).

**Interactive Websites** are a brilliant way to get learners engaged and active with learning content at the ActivPanel. Below are some favourite websites shared by teachers I have worked with.

<https://classroomscreen.com/>

Manage your classroom in a fun and engaging way. Classroomscreen is packed with widgets for teachers: timers, group makers, interactive polls and much more.

<https://phet.colorado.edu/>

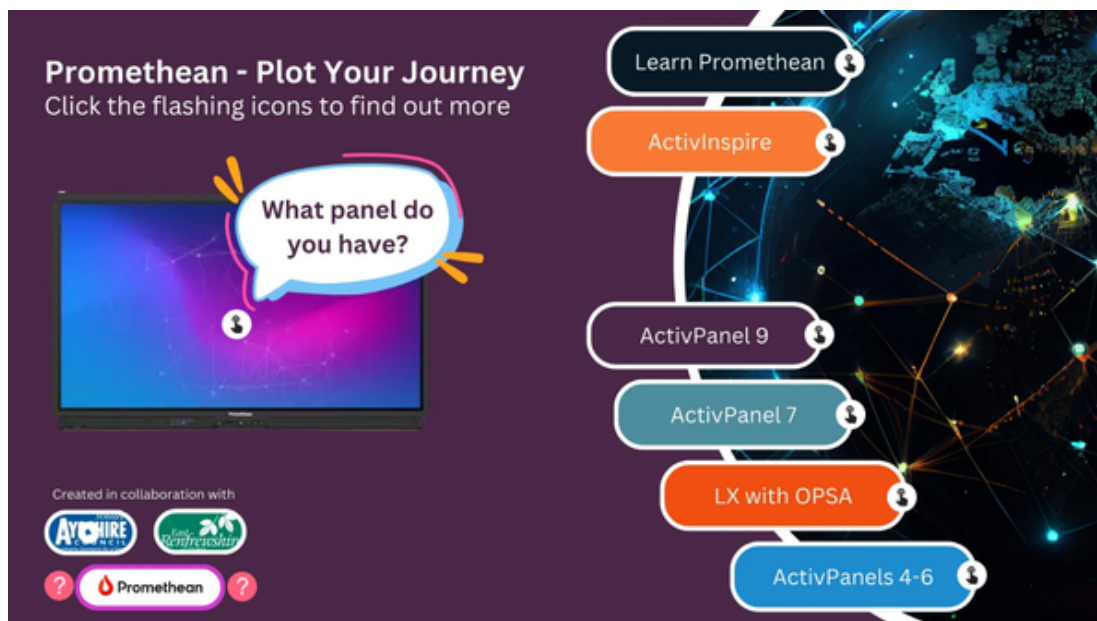

Founded in 2002 by Nobel Laureate Carl Wieman, the PhET Interactive Simulations project at the University of Colorado Boulder creates free interactive math and science simulations. This is a brilliant website for any science teacher in the post primary sector or primary teachers wanting to showcase physics, chemistry, maths, earth science and biology concepts to students.

<https://app.pobble.com/>

Pobble is a website that promotes children's writing. You can upload and show off your students work to the world. However it is also a fantastic resource for teachers when preparing students to write. It has pre-made writing lessons, imagination starters and structured activities that facilitate both writing skills and creativity.
