

Eco Review of 2017-2018 – Langcraigs Primary School

Last year Eco warriors tackled four areas of environmental sustainability:

LITTER

A photography completion proved very enlightening - highlighting the beauty and the messiness of school grounds. Litter was picked, audits were taken, posters were placed, local adults were interviewed but the statistics showed our efforts had little impact. A new strategy will be required for 2018-2019!

WATER

Water caught everyone's imagination. Blue Planet inspired days with fashion shows and recycling activities, and awareness-raising assemblies all helped to keep this our hot topic.

FOOD WASTE

This was a tricky one. Our citizenship groups raised the profile of the mountainous problem of food waste. The ECO committee spent a great deal of effort in emailing local government to ensure that we were a constant part of the recycling food chain.

SUSTAINABILITY

During Citizenship groups children looked at a world of refugees and unequal resources. They helped to tackle this through supporting Mary's Meals and providing resources – enabled by using money raised in cake sales and with filled backpacks collected as donations throughout the school.

Lots of achievements to build on for 2018-2019. The new Eco Committee have already begun the environmental review for this year, with heaps of fantastic Eco ideas!
