

Langcraigs Primary School have Achieved their 4th Green Flag!

Fantastic news!

The Eco Committee of Langcraigs Primary School have won their 4th Green Flag! This is a great achievement.

The Eco Schools team were most impressed by the fantastic proactivity and leadership of the teams of children who made up the Eco Committee during 2020 and 2021. It was amazing how much they managed to achieve in the short and disjointed time they had outside lockdowns. Keep Scotland Beautiful, who judged our application, gave special commendation to all those children throughout the school who created the fabulous Pop-up Gardens during lockdown; to the growers and sowers who planted beans and seeds and sent the photographs of their achievements to Seesaw and to all of you who rediscovered the biodiversity and beauty of the Glennifer Braes Country park. You can see some of our growers and sowers and biodiversity auditors in action below.

This year's Eco Committee have been voted in and are already showing themselves to be bold, outspoken, proactive defenders of the environment. They have chosen to tackle the litter in our playground and surrounding area and to reduce the waste in school. They have plans to increase our biodiversity by planting trees and wildflowers and improve the school grounds.

The committee members are the core and engine of change, they will be successful with the support of the classes they represent and from the efforts of you, the parents. Watch this space for ways in which you can help our Eco Committee make our world a better place!
