

An online fun-filled version of the Olympic Games is being launched for primary school pupils during the lockdown.

Every Monday from May 11, schools will send their pupils the rules and a video description of that week's sporting event they can practise before entering their best results to a special website page.

An explanation of each week's event will also be posted each Monday on Renfrewshire Leisure's social media channels.

Pupils can practise the particular week's sporting or fitness event before they log their result on a website page, they'll be given a link to. The deadline for any week's event will be the following Sunday at 11.59 pm.

Each pupil's results will go towards their school's total and weekly league tables will be published on Renfrewshire Leisure's social media.

At the end of the seven weeks, the school that is at the top of the league and outright winners of the first-ever RL Online Olympics will be announced and once lockdown is over, they will be presented with a trophy.
