

P5 Term in a Nutshell -Term 4

Literacy

In Literacy, we have been really engaged in our class novel, *The Secrets of Vesuvius*. Through this novel, we were able to develop our skills in answering higher order questions, inference in particular. We continued to use Literacy Circles to respond to our novel in both orally and written. We presented information to others as a group and individually for our IDL topic.

Numeracy

In Numeracy, we have been working on rounding & estimating, symmetry, coordinates, information handling & data analysis, more fractions, decimals & percentages and problem solving.

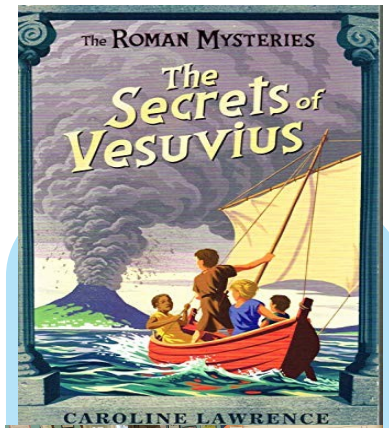

HWB

We have continued to work on the EmotionWorks programme, thinking about triggers and regulation strategies. We learned about the effects of smoking and about the nasty things that are included in cigarettes

In PE, we have been developing our athletics skills and fitness levels, as well as practicing for Sports Day. We also had some taster sessions for squash, which we really enjoyed.

IDL

Our Interdisciplinary Learning has focused on Natural Disasters. We learned about the different types of natural disasters around the world- what caused them, the effects on the land and the impact on people. We focused mainly on volcanoes, as our class novel was about Mount Vesuvius' famous eruption.

"I thought the novel would be boring but it was really interesting and exciting" **Rebecca**

"All the work about volcanoes was really interesting, I love it" **Jacob**

"It was really so much fun to learn about food and energy with the Eatwell plate"

Leon
