RESEARCH IS THE FOUNDATION

Research and preparation is key when you're starting to think about your personal statement.

Before you start writing anything, take some time to:

- mind map what you might want to include
- build up a bank of examples you can refer to
- list evidence of your skills and experiences
- rank your evidence and examples that are MOST relevant to the course(s) you're thinking of applying to

Don't worry about making your notes perfect; this is about checking you fully understand the course and have specifics to refer to in your personal statement.

Whether you know what you're applying to or still considering your options, the more research you do the easier it will be to write.

WHERE CAN I START?

There are lots of places you can start to research the details of the course(s) / subject you're looking to apply to.

- Start by looking at the course description; this'll help you with what to include and give you a good idea of what they are looking for.
- If you visit a UCAS Discovery event, ask the university or college representatives.
- Attend an open day and ask faculty staff what they like to see in the personal statement.
- Use Unibuddy to speak to a student ambassador on a course you're interested in.

Remember requirements may differ for each university or college, as well as depending heavily on the course. So, this research on your chosen area of study is vital before you start writing your personal statement.
