

Williamsburgh ELCC 25-26

Term 1 - What we will be learning

Within term 1, the children will be focussing on building trusting, positive relationships with adults and other children. Learning about caring, sharing and fairness and developing new friendships. They will be learning to share their opinions and experiences with others, talk about feelings and develop their social and independence skills through new snack and lunch routines.

Children will be supported in developing their communication skills through their play, discussing stories, characters, making choices and discovering new information. Sharing experiences through role play, mark making and exploring - opportunities to record their experiences in different ways.

The children will have opportunity to explore numeracy throughout the whole nursery, investigating number, shape, measure and size through their play. Learning about times in the day, routine and hygiene.

Children will have freedom to explore outdoors in all weather, learning to assess their own risk and develop their movement skills through energetic free flow play.

UNCRC - Feelings, being happy, fairness and sharing, taking turns and importance of being listened to
