

Equivalent Fractions

Multiplication: S1

1) $\frac{2}{5} = \frac{6}{\square}$

× $\frac{\square}{5}$ →

× $\frac{2}{\square}$ →

2) $\frac{1}{3} = \frac{\square}{6}$

× $\frac{\square}{3}$ →

× $\frac{1}{\square}$ →

3) $\frac{7}{4} = \frac{\square}{20}$

× $\frac{\square}{4}$ →

× $\frac{7}{\square}$ →

4) $\frac{5}{8} = \frac{30}{\square}$

× $\frac{\square}{8}$ →

× $\frac{5}{\square}$ →

5) $\frac{1}{2} = \frac{9}{\square}$

× $\frac{\square}{2}$ →

× $\frac{1}{\square}$ →

6) $\frac{9}{4} = \frac{\square}{16}$

× $\frac{\square}{4}$ →

× $\frac{9}{\square}$ →

7) $\frac{3}{5} = \frac{6}{\square}$

× $\frac{\square}{5}$ →

× $\frac{3}{\square}$ →

8) $\frac{5}{7} = \frac{\square}{21}$

× $\frac{\square}{7}$ →

× $\frac{5}{\square}$ →

9) $\frac{1}{4} = \frac{\square}{28}$

× $\frac{\square}{4}$ →

× $\frac{1}{\square}$ →

10) $\frac{8}{3} = \frac{40}{\square}$

× $\frac{\square}{3}$ →

× $\frac{8}{\square}$ →
