

1) Jason has drawn two bar models to compare $\frac{3}{4}$ and $\frac{2}{8}$.

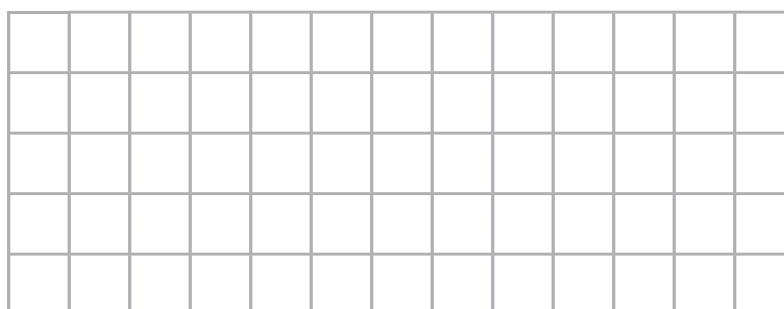

a) Explain the mistakes that Jason has made.

b) What advice would you give Jason to improve his understanding of fractions?

c) Draw two bar models to correctly compare these fractions.

$$\frac{3}{4} \square \frac{2}{8}$$

2) Pearl has ordered these fractions from smallest to largest. Is she correct?

$$\frac{1}{4} \quad \frac{3}{8} \quad \frac{1}{2} \quad \frac{3}{4} \quad \frac{7}{8}$$
